Volume 10855

Proceedings of SPIE, 1605-7422, V. 10855

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Diagnostic and Therapeutic Applications of Light in Cardiology 2019, edited by Kenton W. Gregory, Laura Marcu,
Proc. of SPIE Vol. 10855, 1085501 · © 2019 SPIE · CCC code: 1605-7422/19/\$18 · doi: 10.1117/12.2531190

Proc. of SPIE Vol. 10855 1085501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

OCT

10855 03	Megahertz intravascular Doppler optical coherence tomography enables simultaneous morphological and flow pattern imaging [10855-2]
----------	---

POSTER SESSION

10855 0R	Photons transmission on thoracic tissues by Monte Carlo modeling based on the visible Chinese human dataset [10855-27]
----------	---

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

James G. Fujimoto, Massachusetts Institute of Technology
(United States)

R. Rox Anderson, Wellman Center for Photomedicine, Massachusetts
General Hospital (United States) and Harvard Medical School
(United States)

Symposium Co-chairs

Jennifer K. Barton, The University of Arizona (United States)

Wolfgang Drexler, Medical University of Vienna (Austria)

Program Track Chairs

Brian Jet-Fei Wong, Beckman Laser Institute and Medical Clinic,
University of California, Irvine (United States)

Eva Sevick, The University of Texas Health Science Center at Houston
(United States)

Conference Chairs

Kenton W. Gregory, Oregon Medical Laser Center (United States)

Laura Marcu, University of California, Davis (United States)

Conference Program Committee

Christine P. Hendon, Columbia University (United States)

Gijs van Soest, Erasmus MC (Netherlands)

Stanislav Y. Emelianov, The University of Texas at Austin (United States)

Guillermo J. Tearney, Massachusetts General Hospital (United States)

Session Chairs

1 OCT

Gijs van Soest, Erasmus MC (Netherlands)

2 Imaging and Vascular Materials

Christine P. Hendon, Columbia University (United States)

3 Multimodal Imaging

Sean P. Madden, InfraReDx, Inc. (United States)

- 4 Spectroscopy and Optical Mapping
Laura Marcu, University of California, Davis (United States)
- 5 Therapy and Monitoring
Kenton W. Gregory, Oregon Medical Laser Center (United States)
