Volume 10995

Proceedings of SPIE 0277-786X, V. 10995

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Pattern Recognition and Tracking XXX, edited by Mohammad S. Alam, Proc. of SPIE Vol. 10995,
1099501 · © 2019 SPIE · CCC code: 0277-786X/19/$18 · doi: 10.1117/12.2536371

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 NOVEL PATTERN RECOGNITION TECHNIQUES

10995 02 **Improved visible to IR image transformation using synthetic data augmentation with cycle-consistent adversarial networks (Invited Paper)** [10995-1]

10995 04 **Neural network in a multi-agent system for line detection task in images** [10995-3]

10995 05 **Target tracking and classification directly in compressive measurement for low quality videos** [10995-4]

10995 06 **Compressive object tracking and classification using deep learning for infrared videos** [10995-5]

SESSION 2 TARGET TRACKING AND CLASSIFICATION

10995 07 **Small target detection for search and rescue operations using distributed deep learning and synthetic data generation** [10995-6]

10995 08 **Automatic pavement crack classification on two-dimensional VIAPIX images** [10995-7]

10995 09 **Robust infrared target tracking using thermal information in mean-shift** [10995-8]

SESSION 3 CORRELATION BASED RECOGNITION

10995 0B **Taking correlation from 2D to 3D: optical methods and performance evaluation (Invited Paper)** [10995-10]

10995 0C **Nonparametric kernel smoothing classification to enhance optical correlation decision performances** [10995-11]

10995 0E **Hardware design of correlation filters for target detection** [10995-13]

10995 0F **Wireless charging pad detection and alignment using a fisheye camera for electric vehicles** [10995-14]

SESSION 4 DEEP LEARNING BASED RECOGNITION

10995 0G **Suitability of features of deep convolutional neural networks for modeling somatosensory information processing** [10995-16]

10995 0I **Optimized training of deep neural network for image analysis using synthetic objects and augmented reality** [10995-18]

10995 0K **Actionable surveillance identification (ASI)** [10995-20]

SESSION 5 ADVANCED RECOGNITION TECHNIQUES

10995 0L **Robust detection and removal of dust artifacts in retinal images via dictionary learning and sparse-based inpainting** [10995-21]

10995 0N **Enhanced target recognition employing spatial correlation filters and affine scale invariant feature transform** [10995-23]

10995 0P **Optimization of the jamming signal parameters for conical-scan systems** [10995-25]

10995 0Q **Underwater image quality improvement approach based on an adapted Gabor multi-channels filtering** [10995-26]

10995 0R **Classroom engagement evaluation using computer vision techniques** [10995-31]

POSTER SESSION

10995 0S **Automated detection and classification for early stage lung cancer on CT images using deep learning** [10995-27]

10995 0T **A crowd counting method based on multi-column dilated convolutional neural network** [10995-28]

10995 0U **A Chinese acoustic model based on convolutional neural network** [10995-29]

10995 0V **Deep network based 3D hand keypoints prediction from single RGB images** [10995-30]

10995 0W **Generative adversarial networks based super resolution of satellite aircraft imagery** [10995-34]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jay Kumler, JENOPTIK Optical Systems, LLC (United States)
Ruth Moser, Air Force Research Laboratory (United States)

Symposium Co-chair

John M. Pellegrino, Electro-Optical Systems Laboratory, Georgia Institute of Technology (United States)

Conference Chair

Mohammad S. Alam, Texas A&M University-Kingsville (United States)

Conference Program Committee

Ayman Alfalou, ISEN Brest (France)
Vijayan K. Asari, University of Dayton (United States)
Khan M. Iftekharuddin, Old Dominion University (United States)
Jed Khoury, Lartec, Inc. (United States)
Thomas T. Lu, Jet Propulsion Laboratory (United States)
Asif Mehmood, Air Force Research Laboratory (United States)
Vahid R. Riasati, Northrop Grumman Corporation (United States)
Ashit Talukder, The University of North Carolina at Charlotte (United States)
Rupert C. D. Young, University of Sussex (United Kingdom)

Session Chairs

1 Novel Pattern Recognition Techniques
Mohammad S. Alam, Texas A&M University-Kingsville (United States)

2 Target Tracking and Classification
Vahid R. Riasati, Raytheon Space and Airborne Systems (United States)

3 Correlation Based Recognition
Vijayan K. Asari, University of Dayton (United States)

4 Deep Learning Based Recognition
Thomas T. Lu, Jet Propulsion Laboratory (United States)

5 Advanced Recognition Techniques
Asif Mehmood, Air Force Research Laboratory (United States)
