SPIE

Volume 11403

Proceedings of SPIE 0277-786X, V. 11403

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Advanced Optics for Imaging Applications: UV through LWIR V, edited by Jay N. Vizgaitis,
Peter L. Marasco, Jasbinder S. Sanghera, Proc. of SPIE Vol. 11403, 1140301
© 2020 SPIE · CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2572614

Proc. of SPIE Vol. 11403 1140301-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Optics for Imaging Applications: UV through LWIR V*, edited by Jay N. Vizgaitis, Peter L. Marasco, Jasbinder S. Sanghera, Proceedings of SPIE Vol. 11403 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

MATERIALS AND FABRICATION I

- 11403 0B **Radial gradient refractive index from crystallized chalcogenide glass for infrared applications**
[11403-11]

MATERIALS AND FABRICATION II

- 11403 0D **HEL quality polishing of large sapphire substrates** [11403-15]

POSTER SESSION

- 11403 0F **Sulfur-based polymer material with IR transmission from ~700 to 6200nm for low cost lightweight IR solutions** [11403-18]
- 11403 0H **Anti-reflective structured surfaces on soda-lime windows for high power laser applications**
[11403-21]
