

PROCEEDINGS OF SPIE

# ***Autonomous Air and Ground Sensing Systems for Agricultural Optimization and Phenotyping V***

**J. Alex Thomasson**  
**Alfonso F. Torres-Rua**  
*Editors*

**27 April – 8 May 2020**  
**Online Only, United States**

*Sponsored and Published by*  
SPIE

**Volume 11414**

Proceedings of SPIE 0277-786X, V. 11414

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Autonomous Air and Ground Sensing Systems for Agricultural Optimization and Phenotyping V,  
edited by J. Alex Thomasson, Alfonso F. Torres-Rua, Proc. of SPIE Vol. 11414, 1141401  
© 2020 SPIE · CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2572635

Proc. of SPIE Vol. 11414 1141401-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Autonomous Air and Ground Sensing Systems for Agricultural Optimization and Phenotyping V*, edited by J. Alex Thomasson, Alfonso F. Torres-Rua, Proceedings of SPIE Vol. 11414 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## UAS AND SATELLITE DATA FOR PHENOTYPING

---

- 11414 02 **Investigating the potential of satellite imagery for high-throughput field phenotyping applications (Invited Paper)** [11414-1]
- 11414 03 **Assessing crop response to simulated damage utilizing UAS imagery** [11414-2]
- 11414 04 **Lettuce plant health assessment using UAV-based hyperspectral sensor and proximal sensors** [11414-3]
- 11414 05 **Discrimination between and geolocation of cotton and palmer amaranth using spectral and geometric data** [11414-4]
- 11414 06 **Faster R-CNN-based deep learning for locating corn tassels in UAV imagery (Best Paper Award)** [11414-5]

---

## ACCURACY AND AUTOMATION IN UAS PHENOTYPING

---

- 11414 09 **Positioning accuracy assessment of a commercial RTK UAS** [11414-8]
- 11414 0A **An open, scalable, and flexible framework for automated aerial measurement of field experiments** [11414-9]

---

## EVAPOTRANSPIRATION AND MOISTURE MEASUREMENT WITH UAS IMAGERY I

---

- 11414 0B **Estimation of evapotranspiration and energy fluxes using a deep-learning-based high-resolution emissivity model and the two-source energy balance model with sUAS information** [11414-10]
- 11414 0C **Estimating actual crop evapotranspiration using deep stochastic configuration networks model and UAV-based crop coefficients in a pomegranate orchard** [11414-11]

---

## EVAPOTRANSPIRATION AND MOISTURE MEASUREMENT WITH UAS IMAGERY II

---

- 11414 0F **Implications of soil and canopy temperature uncertainty in the estimation of surface energy fluxes using TSEB2T and high-resolution imagery in commercial vineyards (Best Paper Award)** [11414-14]

11414 0G **To what extent does the Eddy Covariance footprint cutoff influence the estimation of surface energy fluxes using two source energy balance model and high-resolution imagery in commercial vineyards?** [11414-16]

---

**AERIAL AND GROUND-BASED PHENOTYPING I**

---

11414 0J **Weed identification and removal using machine learning techniques and unmanned ground vehicles** [11414-20]

---

**AERIAL AND GROUND-BASED PHENOTYPING II**

---

11414 0K **A low-cost proximate sensing method for early detection of nematodes in walnut using Walabot and scikit-learn classification algorithms** [11414-21]

11414 0L **Detection of crown rot in wheat utilising near-infrared spectroscopy: towards remote and robotic sensing** [11414-22]

11414 0M **The future of cooperative air and ground phenotyping** [11414-24]
