

PROCEEDINGS OF SPIE

16th International Symposium on Medical Information Processing and Analysis

**Eduardo Romero
Natasha Lepore
Jorge Brieva
Marius Linguraru**
Editors

**3–4 October 2020
Lima, Peru, Virtual Meeting**

Organized by
SIPAIM Foundation (International)

Sponsored by
SIPAIM Foundation (International)

Endorsed by
MICCAI—The Medical Image Computing and Computer Assisted Intervention Society

Cosponsored and Published by
SPIE

Volume 11583

Proceedings of SPIE 0277-786X, V. 11583

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

16th International Symposium on Medical Information Processing and Analysis, edited by Eduardo Romero
Natasha Lepore, Jorge Brieva, Marius Linguraru, Proc. of SPIE Vol. SIP220, SIP22000
© 2020 SPIE · CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2587203

Proc. of SPIE Vol. SIP220 1158301-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *16th International Symposium on Medical Information Processing and Analysis*, edited by Eduardo Romero, Natasha Lepore, Jorge Brieva, Marius Linguraru, Proceedings of SPIE Vol. 11583 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

BRAIN IMAGING I

- 11583 02 **Unsupervised domain adaptation via CycleGAN for white matter hyperintensity segmentation in multicenter MR images** [11583-14]
- 11583 03 **Accurate brain age prediction using recurrent slice-based networks** [11583-32]
- 11583 04 **Patch-based surface morphometry feature selection with federated group lasso regression** [11583-3]
- 11583 05 **Cross-sectional exploration of local spatial arrangements in brain magnetic resonance in healthy and Alzheimer subjects** [11583-21]

BRAIN IMAGING II

- 11583 06 **Sex-dependent age trajectories of subcortical brain structures: analysis of large-scale percentile models and shape morphometry** [11583-18]
- 11583 07 **Advanced diffusion-weighted MRI metrics detect sex differences in aging among 15,000 adults in the UK Biobank** [11583-28]
- 11583 08 **Exogenous sex hormone effects on brain microstructure in women: a diffusion MRI study in the UK Biobank** [11583-33]

DEEP LEARNING

- 11583 09 **Deep transfer learning of brain shape morphometry predicts Body Mass Index (BMI) in the UK Biobank** [11583-11]
- 11583 0A **Deep-learning based tractography for neonates** [11583-22]
- 11583 0B **Deep learning architectures for the analysis and classification of brain tumors in MR images** [11583-27]
- 11583 0C **Deep learning for coronary artery segmentation in x-ray angiograms using a patch-based training** [11583-2]

ULTRASOUND

- 11583 OD **High performance ultrasound simulation using Monte-Carlo simulation: a GPU ray-tracing implementation** [11583-7]
- 11583 OE **2D PCA for automatic segmentation of the prostate in ultrasound images** [11583-8]
- 11583 OF **Analysis and classification of lung and muscular tissues in ultrasound images using 2D wavelet transform and machine learning** [11583-9]
- 11583 OG **Endoscopic ultrasound database of the pancreas** [11583-44]

OCULAR AND BODY IMAGING

- 11583 OH **Segmentation of retinal fluids and hyperreflective foci using deep learning approach in optical coherence tomography scans** [11583-38]
- 11583 OI **Segmentation of exudates in fundus images applying color mathematical morphology** [11583-42]
- 11583 OJ **Low-limb muscles segmentation in 3D freehand ultrasound using non-learning methods and label transfer** [11583-4]
- 11583 OK **Non-nuclei characterization in histopathological images: a processing step to improve nuclei segmentation methods** [11583-23]

E-HEALTH AND AI

- 11583 OL **Quantitative CT perfusion: Does CT dose and vascular flow rate affect measures of parametric maps?** [11583-13]
- 11583 OM **Comparison of machine learning models for the prediction of cancer cells using MHC class I complexes** [11583-20]
- 11583 ON **A perceptive watermarking approach applied to COVID-19 imaging data** [11583-34]
- 11583 OO **3D printing novel PPE for response to COVID-19 related shortages** [11583-17]

BIOSIGNALS I

- 11583 OP **A novel approach for QRS complex detection in patients with atrial arrhythmia** [11583-5]
- 11583 OQ **Modeling the vital sign space to detect the deterioration of patients in a pediatric intensive care unit** [11583-31]

11583 OR **Non-contact breathing rate monitoring system using a magnification technique and artificial hydrocarbon networks** [11583-39]

11583 OS **EEG feature selection for ADHD detection in children** [11583-30]

BIOSIGNALS II

11583 OT **Unpaired PET/CT image synthesis of liver region using CycleGAN** [11583-6]

11583 OU **Music-based neurofeedback system for stress regulation and memory stimulation** [11583-10]

11583 OV **Bidimensional analysis of reverberant shear wave elastography with multiple aleatory mini-surface sources: a simulation study** [11583-36]

11583 OW **Automatic estimation of pose and falls in videos using computer vision model)** [11583-25]
