Proceedings of SPIE, 1605-7422, V. 11963

Polarized Light and Optical Angular Momentum for Biomedical Diagnostics 2022, edited by Jessica C. Ramella-Roman, Hui Ma, Tatiana Novikova, Daniel S. Elson, I. Alex Vitkin, Proc. of SPIE Vol. 11963, 1196301 · © 2022 SPIE · 1605-7422 · doi: 10.1117/12.2634629

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Polarized Light and Optical Angular Momentum for Biomedical Diagnostics 2022*, edited by Jessica C. Ramella-Roman, Hui Ma, Tatiana Novikova, Daniel S. Elson, I. Alex Vitkin, Proc. of SPIE 11963, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

HOT TOPICS IN POLARIZATION AND ANGULAR MOMENTUM

- 11963 02 **Enhancing polarisation imaging through novel polarimetry and adaptive optics (Invited Paper)** [11963-31]
- 11963 03 **Stokes-Mueller correlation calculus (Invited Paper)** [11963-1]
- 11963 04 **The effect of extracellular matrix properties on polarized light-based analysis of collagen fiber alignment in soft tissues (Best Student Paper Award)** [11963-4]

PRE-CLINICAL APPLICATIONS OF POLARIMETRY I

- 11963 05 **Organic tissue recognition through polarimetric-based algorithm** [11963-5]

PRE-CLINICAL APPLICATIONS OF POLARIMETRY II

- 11963 06 **Calibration method for multiwavelength Mueller matrix microscope based on dual DoFP polarimeters** [11963-9]
- 11963 07 **Deep learning-based polarization feature retrieval from a single stokes vector (Best Student Paper Award)** [11963-10]
- 11963 08 **Polarized light reflectance anisotropy measurement of hydrated and desiccated superficial porcine skin** [11963-11]
- 11963 09 **Wide-field NIR imaging Mueller polarimetric system for tissue analysis** [11963-15]

CLINICAL APPLICATIONS OF POLARIMETRY

- 11963 0A **A speculum free portable preterm imaging system (Best Student Paper Award)** [11963-14]

MICROSCOPY AND OCT II

- 11963 0B **Machine learning powered Mueller matrix microscope for collagen and elastin visualization in the mouse cervix [11963-28]**
- 11963 0C **Quantitative assessment of tissue structures based on Mueller matrix polarimetry and derived parameters imaging [11963-26]**

Conference Committee

Symposium Chairs

Jennifer Barton, The University of Arizona (United States)
Wolfgang Drexler, Medical University of Vienna (Austria)

Program Track Chairs

E. Duco Jansen, Vanderbilt University (United States)
Jessica C. Ramella-Roman, Florida International University
(United States)

Conference Chairs

Jessica C. Ramella-Roman, Florida International University
(United States)
Hui Ma, Tsinghua University Shenzhen International Graduate School
(China)
Tatiana Novikova, Laboratory de Physique des Interfaces et des
Couches Minces (France)

Conference CoChairs

Joseph Chue-Sang, National Institute of Standards and Technology
(United States)
Tananant Boonya-Ananta, Florida International University
(United States)
Daniel S. Elson, Imperial College London (United Kingdom)
I. Alex Vitkin, University Health Network (Canada)

Conference Program Committee

Sophie Brasselet, Institut Fresnel (France)
Christian Brosseau, University de Bretagne Occidentale (France)
Juan Campos, University Autònoma de Barcelona (Spain)
Russell A. Chipman, Wyant College of Optical Sciences
(United States)
Anabela Da Silva, Institut Fresnel (France)
Nirmalya Ghosh, Indian Institute of Science Education and Research
Kolkata (India)
Viktor Gruev, University of Illinois (United States)
George S. D. Gordon, The University of Nottingham (United Kingdom)
Francois Hache, Laboratory d'Optique et Biosciences (France)
Steven L. Jacques, University of Washington (United States)

Olga Korotkova, University of Miami (United States)
Yanqiu Li, Nikon Corporation (Japan)
Igor V. Meglinski, University of Oulu (Finland)
Razvigor Ossikovski, Laboratory de Physique des Interfaces et des
Couches Minces (France)
Angelo Pierangelo, Laboratory de Physique des Interfaces et des
Couches Minces (France)
Valery V. Tuchin, Saratov State University (Russian Federation)
Anna N. Yaroslavsky, University of Massachusetts Lowell
(United States)
