

Medical Imaging 2023

Digital and Computational Pathology

John E. Tomaszewski

Aaron D. Ward

Editors

19–23 February 2023

San Diego, California, United States

Sponsored by

SPIE

Cooperating Organizations

American Association of Physicists in Medicine (United States)

Radiological Society of North America

World Molecular Imaging Society

Society for Imaging Informatics in Medicine (United States)

International Foundation for Computer Assisted Radiology and Surgery

Medical Image Perception Society (United States)

Published by

SPIE

Volume 12471

Proceedings of SPIE, 1605-7422, V. 12471

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Medical Imaging 2023: Digital and Computational Pathology, edited by John E. Tomaszewski,

Aaron D. Ward, Proc. of SPIE Vol. 12471, 1247101 · © 2023 SPIE

1605-7422 · doi: 10.1117/12.2682186

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Medical Imaging 2023: Digital and Computational Pathology*, edited by John E. Tomaszewski, Aaron D. Ward, Proc. of SPIE 12471, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

SESSION 1 AUTOMATED QUANTIFICATION OF TISSUE BIOMARKERS

- 12471 02 **Self-supervised deep learning to predict molecular markers from routine histopathology slides for high-grade glioma tumors** [12471-1]
- 12471 03 **Integrating color deconvolution thresholding and weakly supervised learning for automated segmentation of neurofibrillary tangle and neuropil threads** [12471-2]
- 12471 04 **Deep learning to predict the proportion of positive cells in CMYC-stained tissue microarrays of diffuse large B-cell lymphoma** [12471-3]
- 12471 05 **Single-cell gene expression prediction using H&E images based on spatial transcriptomics** [12471-4]

SESSION 2 MULTI-STAIN, MULTIPLEXED, AND MULTISPECTRAL IMAGING AND ANALYSIS I

- 12471 06 **Identification of molecular cell type of breast cancer on digital histopathology images using deep learning and multiplexed fluorescence imaging** [12471-5]
- 12471 07 **A video transformer network for thyroid cancer detection on hyperspectral histologic images** [12471-6]
- 12471 08 **A transformer-based computational approach for H&E to multiplexed immunohistochemistry stain translation** [12471-7]
- 12471 09 **Extended depth of field imaging for mosaic hyperspectral images** [12471-8]

SESSION 3 MULTI-STAIN, MULTIPLEXED, AND MULTISPECTRAL IMAGING AND ANALYSIS II

- 12471 0B **Topological-preserving membrane skeleton segmentation in multiplex immunofluorescence imaging** [12471-10]
- 12471 0C **Interpretable graph convolutional network enables triple negative breast cancer detection in imaging mass cytometry** [12471-11]
- 12471 0D **Generation of RGB EVG stained image from hyperspectral H&E stained image using generative adversarial network (GAN)** [12471-12]

- 12471 OE **Semi-supervised contrastive learning for white blood cell segmentation from label-free quantitative phase imaging** [12471-13]
- 12471 OF **An end-to-end pipeline for 3D slide-wise multi-stain renal pathology registration** [12471-14]
- 12471 OG **Improving quantification of renal fibrosis using deep-DUET** [12471-15]

SESSION 4 GRADING AND CLASSIFICATION OF PATHOLOGY IMAGES I

- 12471 OH **Biopsy and surgical specimen specific deep learning models for prostate cancer detection on digitized pathology images** [12471-16]
- 12471 OI **Analysing hyperplasia in Atlantic salmon gills using empirical wavelets** [12471-17]
- 12471 OJ **Quintet margin loss for an improved knowledge distillation in histopathology image analysis** [12471-20]
- 12471 OK **Spatially aware transformer networks for contextual prediction of diabetic nephropathy progression from whole slide images** [12471-19]

SESSION 5 GRADING AND CLASSIFICATION OF PATHOLOGY IMAGES II

- 12471 OL **Ki67 proliferation index quantification using silver standard masks** [12471-21]
- 12471 OM **The effects of sparsity induction methods on attention-based multiple instance learning applied to Camelyon16** [12471-22]
- 12471 ON **On the benefits of region of interest detection for whole slide image classification** [12471-23]
- 12471 OO **Background detection affects downstream classification of Camelyon16 whole slide images** [12471-24]

SESSION 6 SEGMENTATION OF CELLULAR AND TISSUE STRUCTURES

- 12471 OP **Generating simulated fluorescence images for enhancing proteins from optical microscopy images of cells using massive-training artificial neural networks** [12471-28]
- 12471 OQ **An accelerated pipeline for multi-label renal pathology image segmentation at the whole slide image level** [12471-29]
- 12471 OR **MIMO U-Net: efficient cell segmentation and counting in microscopy image sequences** [12471-30]

WEDNESDAY MORNING KEYNOTES

12471 0S **Translating computational innovations into reality: focus on the users! (Keynote Paper)**
[12471-507]

SESSION 7 COMPUTER-AIDED DIAGNOSIS, PROGNOSIS AND PREDICTIVE ANALYSIS I

12471 0T **Weakly supervised deep learning for predicting the response to hormonal treatment of women with atypical endometrial hyperplasia: a feasibility study** [12471-31]

12471 0U **Spatial connectivity of tumor and associated cells (SpaCell): a novel computational pathology biomarker** [12471-32]

12471 0V **Transformer as a spatially-aware multi-instance learning framework to predict the risk of death for early-stage non-small cell lung cancer** [12471-33]

12471 0W **Spatial uncertainty aggregation for false negatives detection in breast cancer metastases segmentation** [12471-34]

SESSION 8 COMPUTER-AIDED DIAGNOSIS, PROGNOSIS AND PREDICTIVE ANALYSIS II

12471 0X **A novel H&E color augmentation for domain invariance classification of unannotated histopathology prostate cancer images** [12471-35]

12471 0Y **Ink removal in whole slide images using hallucinated data** [12471-36]

12471 0Z **Predicting cell type counts in whole slide histology images using evidential multi-task learning** [12471-37]

12471 10 **Efficient subtyping of ovarian cancer histopathology whole slide images using active sampling in multiple instance learning** [12471-38]

12471 11 **Deep learning combined with ball scale transform for circulating tumor cell enumeration in digital pathology** [12471-39]

SESSION 9 MEDICAL APPLICATIONS

12471 12 **Combining multiple ground truth annotations for segmentation training for oral cavity cancer** [12471-41]

12471 13 **Minimizing the intra-pathologist disagreement for tumor bud detection on H&E images using weakly supervised learning** [12471-42]

12471 14 **A pathomic study for risk stratification and unraveling molecular associations of different histologic subtypes of papillary thyroid cancer** [12471-43]

- 12471 15 **Multi-scale contrastive learning with attention for histopathology image classification** [12471-44]
- 12471 16 **Predicting Crohn's disease severity in the colon using mixed cell nucleus density from pseudo labels** [12471-45]

SESSION 10 FROM CELL DETECTION TO WHOLE-SLIDE IMAGING

- 12471 17 **Deep learning-based rapid macrophage cell detection and localization in high-content microscopy screening** [12471-46]
- 12471 18 **PythoStitcher: an iterative approach for stitching digitized tissue fragments into full resolution whole-mount reconstructions** [12471-47]
- 12471 19 **Investigating the potential of untrained convolutional layers and pruning in computational pathology** [12471-48]
- 12471 1A **YOLOX-based framework for nuclei detection on whole-slide histopathological RGB and hyperspectral images** [12471-49]

POSTER SESSION

- 12471 1B **Digital pathology whole slide image compression with vector quantized variational autoencoders** [12471-50]
- 12471 1C **Deep modality association learning using histopathology images and immune cell sequencing data** [12471-51]
- 12471 1D **Conditional generative adversarial network (cGAN) for synthesis of digital histologic images from hyperspectral images** [12471-52]
- 12471 1E **Simple patch-wise transformations serve as a mechanism for slide-level augmentation for multiple instance learning applications** [12471-53]
- 12471 1F **Integrated image-processing and transcriptomic analysis of cancer-associated fibroblasts (CAFs) in breast cancer subtypes (Cum Laude Poster Award)** [12471-54]
- 12471 1G **Automated identification of cardiomyocyte nuclei in H&E-stained heart tissue with CycleGAN** [12471-55]
- 12471 1H **Effect of color-normalization on deep learning segmentation models for tumor-infiltrating lymphocytes scoring using breast cancer histopathology images** [12471-56]
- 12471 1I **Automated glioma multiclass tumor classification** [12471-57]
- 12471 1J **Role of stain normalization in computational pathology: use case in metastatic tissue classification** [12471-58]

- 12471 1K **Cell2Voxel: a novel, cell-based 3D tissue model from 2D multiplex tissue scans** [12471-59]
- 12471 1L **Space-filling curves for modeling spatial context in transformer-based whole slide image classification** [12471-60]
- 12471 1M **A comparison of histopathology imaging comprehension algorithms based on multiple instance learning** [12471-61]
- 12471 1N **Multi-scale local explanation approach for image analysis using model-agnostic Explainable Artificial Intelligence (XAI)** [12471-62]
- 12471 1O **Fast detection and localization of mitosis using a semi-supervised deep representation** [12471-63]
- 12471 1P **Deep learning segmentation of invasive melanoma** [12471-64]
- 12471 1Q **Generative modeling of histology tissue reduces human annotation effort for segmentation model development** [12471-65]
- 12471 1R **Automated reference kidney histomorphometry using a panoptic segmentation neural network correlates to patient demographics and creatinine** [12471-66]
- 12471 1S **Efficient 3D reconstruction of whole slide images in melanoma** [12471-67]
- 12471 1T **A meta-graph approach for analyzing whole slide histopathological images of human brain tissue with Alzheimer's disease biomarkers** [12471-68]
- 12471 1V **Deep-supervised adversarial learning-based classification for digital histologic images** [12471-70]

DIGITAL POSTER SESSION

- 12471 1W **Enhanced pooling-convolution for pathological image multi-class segmentation** [12471-25]
- 12471 1X **Category feature reconstruction for pathological image segmentation** [12471-26]
- 12471 1Y **Accurate segmentation of nuclear instances using a double-stage neural network** [12471-27]
- 12471 1Z **An ensemble approach for histopathological classification of vulvar cancer** [12471-40]

Conference Committee

Symposium Chairs

Robert M. Nishikawa, University of Pittsburgh (United States)
Despina Kontos, Penn Medicine (United States)

Conference Chairs

John E. Tomaszewski, University at Buffalo (United States)
Aaron D. Ward, The University of Western Ontario (Canada)

Conference Program Committee

Selim Aksoy, Bilkent University (Turkey)
Ulysses J. Balis, University of Michigan Health System (United States)
Rohit Bhargava, University of Illinois at Urbana-Champaign
(United States)
Ulf-Dietrich Braumann, Institut für Angewandte Informatik e.V.
(Germany)
Bradley Brimhall, The University of Texas Health Science Center at
San Antonio (United States)
Matthew J. Cecchini, London Health Sciences Center (Canada)
Keith C. Cheng, Penn State College of Medicine (United States)
Wei-Chung Cheng, United States Food and Drug Administration
(United States)
Eric Cosatto, NEC Laboratories America, Inc. (United States)
Scott Doyle, Rutgers, The State University of New Jersey
(United States)
Alton B. Farris, Emory University (United States)
Michael D. Feldman, The University of Pennsylvania Health System
(United States)
Marios A. Gavrielides, AstraZeneca Pharmaceuticals LP
(United States)
April Khademi, Toronto Metropolitan University (Canada)
Elizabeth A. Krupinski, Emory University School of Medicine
(United States)
Tom R. L. Kimpe, Barco N.V. (Belgium)
Richard M. Levenson, University of California, Davis (United States)
Olivier Lezoray, Université de Caen Basse-Normandie (France)
Geert Litjens, Radboud Universitair Medisch Centrum (Netherlands)
Anant Madabhushi, Emory University School of Medicine
(United States)
Derek R. Magee, University of Leeds (United Kingdom)
Erik Meijering, The University of New South Wales (Australia)

James P. Monaco, Inspirata, Inc. (United States)
Mehdi Moradi, IBM Research (United States)
Bahram Parvin, Lawrence Berkeley National Laboratory
(United States)
Nasir M. Rajpoot, The University of Warwick (United Kingdom)
Berkman Sahiner, United States Food and Drug Administration
(United States)
Pinaki Sarder, University of Florida College of Medicine (United States)
Chukka Srinivas, Amazon Lab126 (United States)
Darren Treanor, University of Leeds (United Kingdom)
Jeroen van der Laak, Radboud Universitair Medisch Centrum
(Netherlands)
Mitko Veta, Technische Universiteit Eindhoven (Netherlands)
Martin J. Yaffe, Sunnybrook Research Institute (Canada)
Bülent Yener, Rensselaer Polytechnic Institute (United States)
