

PROCEEDINGS OF SPIE

Photonics for Quantum 2023

Donald F. Figer
Michael Reimer
Editors

5–8 June 2023
Rochester, New York, United States

Sponsored and Published by
SPIE

Volume 12633

Proceedings of SPIE 0277-786X, V. 12633

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Photonics for Quantum 2023, edited by Donald F. Figer, Michael Reimer,
Proc. of SPIE Vol. 12633, 1263301 · © 2023 SPIE · 0277-786X
doi: 10.1117/12.3002979

Proc. of SPIE Vol. 12633 1263301-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Photonics for Quantum 2023*, edited by Donald F. Figer, Michael Reimer, Proc. of SPIE 12633, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

QUANTUM NETWORKS AND COMMUNICATION

12633 02 **Toward frequency multiplexing for time-bin states** [12633-2]

SATELLITE QKD

12633 03 **Simulation and design of quantum key distribution systems** [12633-7]

QUANTUM REPEATERS

12633 04 **Atomic vapor quantum memory for on-demand semiconductor single photon sources**
[12633-9]

MULTIPHOTON ENTANGLEMENT

12633 06 **Multipartite entanglement and geometry** [12633-26]

12633 07 **Nonlinear optics as a source of high-dimensional genuine tripartite entanglement** [12633-27]

QUANTUM SENSING AND IMAGING

12633 08 **Quantum super-resolution imaging and hypothesis testing** [12633-29]

QUANTUM SENSING

12633 09 **Demonstration of an OPM flux guide scanner for high-resolution magnetic non-destructive testing** [12633-32]

INTEGRATED QUANTUM PHOTONICS

12633 0A **Portable integrated quantum optics for quantum communication** [12633-55]

QUANTUM DOT DEVICES: SINGLE-PHOTON SOURCES II

12633 0B **Conceptual optical design for CARAMUEL payload: a quantum key distribution system from a GEO satellite** [12633-4]

12633 0C **Inflight demonstrator of quantum key distribution between CubeSats of Q-ANSER program** [12633-5]

12633 0D **Quantum interference of identical photons from remote GaAs quantum dots** [12633-40]

HYBRID QUANTUM DEVICES FOR PHOTONIC INTEGRATED CIRCUITS

12633 0E **Backscattering and Hong-Ou-Mandel manifolds in microring resonators** [12633-44]

12633 0F **A simulation methodology for quantum photonic integrated circuits in the presence of fabrication imperfections, loss, and partially distinguishable photons** [12633-47]

ION TRAP QUANTUM COMPUTING

12633 0G **Optical engineering for trapped ion quantum computing (Invited Paper)** [12633-51]

12633 0H **Narrow linewidth laser system based on semiconductor lasers** [12633-53]

POSTER SESSION

12633 0I **Design and implementation of a tunable crystal-heater for spectral variation of entangled non-degenerate photon pairs generated by spontaneous parametric down-conversion** [12633-12]

12633 0J **Fabrication of 780 nm DBR laser diodes for quantum applications** [12633-13]

12633 0K **Optical characterization of 2D MoS₂ and WSe₂ monolayer semiconductors** [12633-20]

Conference Committee

Conference Chairs

Donald F. Figer, Rochester Institute of Technology (United States)
Michael Reimer, University of Waterloo (Canada)

Conference Program Committee

Jonas N. Becker, Michigan State University (United States)
Ryan M. Camacho, Brigham Young University (United States)
Jaime Cardenas, The Institute of Optics, University of Rochester
(United States)
Klea Dhimitri, Hamamatsu Corporation (United States)
Edwin E. Hach III, Rochester Institute of Technology (United States)
Helena Knowles, University of Cambridge (United Kingdom)
Peter Mason, National Research Council Canada (Canada)
Shannon Nicley, Michigan State University (United States)
William Renninger, The Institute of Optics, University of Rochester
(United States)
Alexander V. Sergienko, Boston University (United States)
Philip Walther, Universität Wien (Austria)
