Proc. of SPIE Vol. 12976 1297601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

- 12976 11 **Design of a double-sided Fresnel lens for compact concentration photovoltaics systems** [12976-50]
- 12976 12 **Depth-based defocus elimination for macroscopic Fourier ptychography imaging** [12976-51]
- 12976 13 **Research on large-scale manufacturing technology of low earth orbit constellation** [12976-52]
- 12976 14 **Research on spatial positioning technology of large size anomalous off-axis optical element** [12976-54]
- 12976 15 **An investigation of high dynamic range imaging of highly reflective surfaces based on deep learning 3D fringe projection** [12976-55]
- 12976 16 **Coverage performance and the characteristics of interlayer links of multilayer LEO megaconstellations** [12976-56]
- 12976 17 **Ship detection and recognition based on high-resolution remote sensing imagery** [12976-57]
- 12976 18 **Smart measurement system based on deep learning for microstructured surfaces** [12976-58]
- 12976 19 **Investigating the effect of detector photoelectric parameters on ptychographic iterative engine** [12976-59]
- 12976 1A **Starlink simulation and potential analysis for remote sensing applications** [12976-62]
- 12976 1B **Computing offloading policy for training effectiveness of space-air-ground integrated network** [12976-63]
- 12976 1C **Joint estimation of space target attitude and size based on polarimetric ISAR images and modified U-net model** [12976-64]
- 12976 1D **Measurement uncertainty evaluation of chromatic confocal displacement sensor** [12976-65]
- 12976 1E **The dynamic performance of the spindle in ultra-precision machine tools under different drive systems** [12976-66]
- 12976 1F **Automatic defect recognition in ultrasonic infrared thermography by deep learning of temporal signals** [12976-67]
- 12976 1G **Research on on-orbit calibration source technology for space infrared load** [12976-68]
- 12976 1H **Wafer defect extraction algorithm and analysis for TDI-based line scanning dark-field scattering** [12976-69]
- 12976 1I **Multibeam access link and feeder link integrated spaceborne communication system** [12976-70]

- 12976 1J **Free-form lens design of LED extended light source based on improved weighted superposition optimization** [12976-71]
- 12976 1K **Night vision measuring instrument** [12976-72]
- 12976 1L **Analysis of assembly errors of optomechanical systems** [12976-73]
- 12976 1M **Correct the mid spatial frequency errors of large departure aspheric surfaces by smoothing polishing** [12976-74]
- 12976 1N **Research on stable convergence technology of transmitted wavefront mid-spatial-frequency errors of large square spherical lens** [12976-75]
- 12976 1O **Laser-induced freestanding graphene with porous nanostructure for antimicrobial devices and inhibition of microbial fouling** [12976-78]
- 12976 1P **A white light interferometry stitching measurement method based on feature extraction** [12976-79]
- 12976 1Q **Resist heating in mask fabrication with Gaussian EBL system** [12976-80]
- 12976 1R **Research on two assembling methods of 650 mm SiC lightweight mirror** [12976-81]
- 12976 1S **Research on optical slit setting technique of off-axis triple reflection imaging spectrometer** [12976-82]
- 12976 1T **Focal length measurement of large aperture lenses using CGH** [12976-85]
- 12976 1U **3D reconstruction method of defocused images based on optical system analysis** [12976-86]
- 12976 1V **A high accuracy assembling method of R-C system based on reverse optimization method** [12976-88]
- 12976 1W **Advances and prospects of LEO satellite constellation network supporting satellite-to-smartphone** [12976-89]
- 12976 1X **Simulation of precision bonnet processing with considering edge effect for the x-ray grazing incidence mirror molds** [12976-90]
- 12976 1Y **Development of Wolter-I x-ray focusing mirrors measurement device** [12976-91]
- 12976 1Z **Precision alignment of off-axis multi-reflection optical system based on PSM** [12976-92]
- 12976 20 **Precise assembly and adjustment technology of fully free-form surface multi-reflection off-axis optical system** [12976-94]
- 12976 21 **Internet of Things terminal self-organizing network networking and routing algorithm design** [12976-97]

- 12976 22 **Computer-aided alignment method for a four-mirror off-axis reflective optical system**
[12976-98]
- 12976 23 **Optical axis consistency alignment method for 1m-diameter solar telescope** [12976-99]
- 12976 24 **Research on calibration method for mirror attitude and tilt monitoring system** [12976-100]
- 12976 25 **Reference surface self-calibration stitching algorithm based on Legendre polynomials for testing synchrotron radiation flat mirrors** [12976-101]
- 12976 26 **Research on the influence of low frequency forced vibration on the surface quality of optical elements in ultra precision turning** [12976-102]
- 12976 27 **Design of white light interference inspection device and surface morphology analysis for focus mirror moulds** [12976-104]
- 12976 28 **Development of on-machine surface profile measuring instrument based on white light interference principle** [12976-105]
