

PROCEEDINGS OF SPIE

Optical Technologies for Telecommunications 2023

Anton V. Bourdine
Oleg G. Morozov
Albert Kh. Sultanov
Editors

22–24 November 2023
Kazan, Russian Federation

Organized by
Kazan National Research Technical University (Russian Federation)
Povolzhskiy State University of Telecommunications and Informatics (Russian Federation)
Ufa University of Science and Technology (Russian Federation)

Published by
SPIE

Volume 13168

Proceedings of SPIE 0277-786X, V. 13168

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optical Technologies for Telecommunications 2023, edited by Anton V. Bourdine,
Oleg Gennadevich Morozov, Albert Ch. Sultanov, Proc. of SPIE Vol. 13168,
1316801 · © 2024 SPIE · 0277-786X · doi: 10.1117/12.3049663

Proc. of SPIE Vol. 13168 1316801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optical Technologies for Telecommunications 2023*, edited by Anton V. Bourdine, Oleg G. Morozov, Albert C. Sultanov, Proc. of SPIE 13168, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

OPTICAL COMMUNICATION TECHNOLOGIES AND SYSTEMS

- 13168 02 **Promising optical technologies for implementing F5G advanced networks** [13168-2]
- 13168 03 **Radiophotonic path of intermediate frequency signals of multi-frequency microwave radiometric system for remote sensing of the atmosphere** [13168-6]
- 13168 04 **Prospects of using the optical measurement channel as a part of the complex system of remote sensing of the atmosphere** [13168-7]
- 13168 05 **Integrated functional architecture for the quantum internet of things in quantum internet** [13168-14]
- 13168 06 **Development of a method for reducing peak-to-average power ratio in hybrid OFDM communications based on Kronecker product** [13168-15]
- 13168 07 **Study of the problem of radiation coupling into non-standard optical fibers** [13168-16]
- 13168 08 **Method of RoF-network segment control using chirped optical pulses** [13168-18]
- 13168 09 **The wireless communications systems in subterahertz frequency range (Invited Paper)** [13168-68]

PASSIVE AND ACTIVE OPTICAL COMPONENTS FOR FIBER OPTIC NETWORKS AND INFORMATION MEASURING SYSTEMS

- 13168 0A **Thin-film organic photodetectors in the near-UV range** [13168-3]
- 13168 0B **Synthesis of combined address fiber Bragg structures (Invited Paper)** [13168-12]
- 13168 0C **Single unified platform of fiber optical measuring systems based on combined resonant structures (Invited Paper)** [13168-17]
- 13168 0D **Generation of surface plasmon on graphene coated optical fiber for sensor applications** [13168-19]
- 13168 0E **Results of mode analysis, performed for fabricated silica microstructured optical fiber with equiangular spiral six-ray geometry (Invited Paper)** [13168-20]
- 13168 0F **EDFA optical amplifier for radiophotonic systems** [13168-22]
- 13168 0G **Investigation of the existence of self-oscillations in an optoelectronic generator using the theory of bifurcations** [13168-23]

- 13168 OH **The influence of the number of mel-frequency cepstral coefficients on the voice recognition error probability by a distributed fiber optic sensor (Invited Paper)** [13168-24]
- 13168 OI **Selection issues of equivalent angular misalignment at regular span splices during piecewise regular fiber optic link simulation** [13168-30]
- 13168 OJ **Mode purity analysis of octagonal, spiral, and hexagonal shaped photonic crystal fiber for OAM mode propagation** [13168-36]
- 13168 OK **Silicon nitride ring resonators based all-optical CNOT logic gate** [13168-37]
- 13168 OL **Experimental researches and testing of silica twisted six-GeO₂-doped core microstructured optical fiber. Part IV: Results of spectral response measurements under direct tension** [13168-38]
- 13168 OM **Photonic integrated circuit design for the dual band SS-OCT** [13168-40]
- 13168 ON **Fiber optic temperature monitoring system for high-voltage busbars and contacts** [13168-44]
- 13168 OO **Methods for interrogating FBG and AFBS in problems of monitoring mechanical vibration parameters** [13168-50]
- 13168 OP **Synthesis of symmetrical wave and phase address fiber Bragg structures (Invited Paper)** [13168-58]
- 13168 OQ **Modeling of multi-layer fiber-optic Fabry-Perot interferometer as a sensing element of humidity, pressure, and temperature** [13168-63]
- 13168 OR **Comprehensive fiber optic sensor for photovoltaic panels parameters monitoring** [13168-64]
- 13168 OS **Qualitative comparison of the different photonic based frequency measurement methods** [13168-67]
- 13168 OT **Results of dispersion analysis for the fundamental mode in silica microstructured optical fiber with 6-GeO₂-doped cores** [13168-69]
- 13168 OU **Results of mode and dispersion analysis for silica few-mode hollow-GeO₂-doped-ring core microstructured optical fiber** [13168-70]

ONE-DIMENSIONAL AND MULTIDIMENSIONAL OPTICAL SIGNAL DATA PROCESSING

- 13168 OV **Diffraction of a polarized Gaussian beam on elliptical and circular plates** [13168-1]
- 13168 OW **The speckle reducing on the multidimensional television signals by two-camera profile sensor** [13168-4]
- 13168 OX **Processing of multidimensional television images from UAV for panorama creation** [13168-5]
- 13168 OY **Comparative modeling of 3D image formation in apodized system with rotating PSFs** [13168-9]
- 13168 OZ **Focusing a locally elliptically polarized field to control the complex distribution of the longitudinal component of the Umov-Poynting vector** [13168-10]

- 13168 10 **The optical vortices polarization state recognition by diffraction axicons with variable height using high-performance computer systems** [13168-11]
- 13168 11 **Experimental researches and testing of silica twisted six-GeO₂-doped core microstructured optical fiber. Part III: results of far-field white light beam profile measurements** [13168-29]
- 13168 12 **Probabilistic model of age-related macular degeneration staging** [13168-33]
- 13168 13 **Results of laser beam profile measurements after propagation over untwisted and twisted silica hollow-GeO₂-doped-ring core microstructured optical fibers, combined with large core multimode optical fiber** [13168-35]
- 13168 14 **Predicting the development of an observed process from its digital image** [13168-39]
- 13168 15 **Investigation of the effect of applying continuous wavelet analysis on the NIST FFT test passing performance of random noise generated by an InGaAs p-i-n photodiode-based optical random number generator** [13168-51]
- 13168 16 **Photonic fractal differentiator based on Moiré type addressed fiber Bragg structure** [13168-59]
- 13168 17 **Photonic differentiator of integer order based on Moiré type addressed fiber Bragg structure** [13168-60]
- 13168 18 **A method for verifying the results of virtual modeling of building structures using fiber-optic technologies** [13168-65]

MAINTENANCE, MONITORING, AND RESTORATION OF FIBER OPTIC NETWORKS

- 13168 19 **Study of the possibility of the optical fiber condition monitoring using phase-sensitive OTDR. Part I: acoustic emission testing** [13168-25]
- 13168 1A **Study of the possibility of the optical fiber condition monitoring using phase-sensitive OTDR. Part II: nonlinear acoustic emission method** [13168-26]
- 13168 1B **Field tests of the underground dielectric optical fiber cable route tracing method (Invited Paper)** [13168-27]
- 13168 1C **Analysis of route search methods and location localization damage to the all-dielectric optical cable** [13168-41]

ADVANCED TECHNOLOGIES OF OPTICAL COMMUNICATIONS

- 13168 1D **Using holographic coding to improve image transmission speed (Invited Paper)** [13168-8]
- 13168 1E **Structural minimization and technology miniaturization in microwave photonic means** [13168-13]
- 13168 1F **Control of the diffraction orders formation at the quantization of vortex lens phase** [13168-21]
- 13168 1G **Combined type microwave photonic vector analyzers for a comprehensive assessment of transfer and linear characteristics** [13168-31]

- 13168 1H **Optoelectronic oscillator frequency tuning based on loop-back control** [13168-32]
- 13168 1I **Mode propagation optimization for a microring-based optical vortex beam emitter (Invited Paper)** [13168-34]
- 13168 1J **Optimization of Si3N4 nanophotonic resonator taking into account the substrate influence** [13168-49]
- 13168 1K **Quantum commutator with photonic interface and polarization quantum memory (Invited Paper)** [13168-56]
- 13168 1L **Neuromorphic photonics circuit for efficient multichannel signal coding (Invited Paper)** [13168-57]
- 13168 1M **Coherent photonic time stretch for ultrafast spectrum measurement** [13168-66]

PROBLEMS OF SPECIALIST TRAINING IN THE FIELD OF OPTICAL COMMUNICATIONS

- 13168 1N **Formation of personal competencies of students in the field of training information and communication technologies and systems** [13168-28]

Conference Committee

Conference Chairs

Anton V. Bourdine, Povolzhskiy State University of Telecommunications and Informatics (Russian Federation), JSC "Scientific Production Association State Optical Institute n.a. S.I. Vavilov" (Russian Federation)

Oleg G. Morozov, Kazan National Research Technical University named after A. N. Tupolev – KAI (Russian Federation)

Albert Kh. Sultanov, Ufa University of Science and Technology (Russian Federation)

Executive Secretary of the Conference

Alexander A. Ivanov, Kazan National Research Technical University named after A. N. Tupolev – KAI (Russian Federation)

Organizing Committee Co-chairs

Vadim P. Zakharov, Ufa University of Science and Technology (Russian Federation)

Timur L. Alibaev, Kazan National Research Technical University named after A. N. Tupolev – KAI (Russian Federation)

Vadim A. Ruzhnikov, Povolzhskiy State University of Telecommunications and Informatics (Russian Federation)

Organizing Committee

Artur F. Agliullin, MFS LLC (Russian Federation)

Sergey A. Babin, Institute of Automation and Electrometry SB RAS (Russian Federation)

Valeriy Kh. Bagmanov, Ufa State Aviation Technical University (Russian Federation)

Michael P. Fedoruk, Novosibirsk State University (Russian Federation)

Ildar R. Gabitov, Skolkovo Institute of Science and Technology (Russian Federation)

Artur V. Gleim, JSC Russian Railways (Russian Federation)

Evgeny N. Gordeev, UNI (Russian Federation)

Igor V. Grigorov, Povolzhskiy State University of Telecommunications and Informatics (Russian Federation)

Michael V. Dashkov, Povolzhskiy State University of Telecommunications and Informatics (Russian Federation)

Vladimir P. Drachev, Skolkovo Institute of Science and Technology (Russian Federation)

Konstantin V. Dukelskii, JSC "Scientific Production Association State Optical Institute n.a. S.I. Vavilov" (Russian Federation)
German I. Il'in, Kazan National Research Technical University named after A. N. Tupolev – KAI (Russian Federation)
Vladimir G. Kartashevsky, Povolzhskiy State University of Telecommunications and Informatics (Russian Federation)
Nicolay L. Kazanskiy, Samara University (Russian Federation)
Yuri A. Konstantinov, Perm Federal Research Center UrB RAS (Russian Federation)
Sergey A. Moiseev, Perm Federal Research Center UrB RAS (Russian Federation)
Gennady A. Morozov, Kazan National Research Technical University named after A. N. Tupolev – KAI (Russian Federation)
Adel F. Nadeev, Kazan National Research Technical University named after A. N. Tupolev – KAI (Russian Federation)
Oleg E. Naniy, Moscow State University named after M. V. Lomonosov (Russian Federation)
Ilnur I. Nureev, Kazan National Research Technical University named after A. N. Tupolev – KAI (Russian Federation)
Oleg V. Osipov, Povolzhskiy State University of Telecommunications and Informatics (Russian Federation)
Vladimir P. Pervadchuk, Perm State Technical University (Russian Federation)
Aleksey S. Raevsky, Nizhny Novgorod State Technical University named after R. E. Alekseev (Russian Federation)
Natalya V. Ryabova, Volga State University of Technology (Russian Federation)
Airat Zh. Sakhabutdinov, Kazan National Research Technical University named after A. N. Tupolev – KAI (Russian Federation)
Renat B. Salikhov, Ufa University of Science and Technology (Russian Federation)
Vladimir A. Shevtsov, Moscow Aviation Institute (Russian Federation)
Ghanshyam Singh, Malaviya National Institute of Technology (India)
Aleksandr L. Timofeev, Ufa University of Science and Technology (Russian Federation)
Manish Tiwari, Manipal University Jaipur (India)
Irina L. Vinogradova, Ufa University of Science and Technology (Russian Federation)
Aleksey M. Zheltikov, Moscow State University named after M. V. Lomonosov (Russian Federation)
