

PROCEEDINGS OF SPIE

***Techniques and Instrumentation
for Detection of Exoplanets III***

Daniel R. Coulter
Editor

28–30 August 2007
San Diego, California, USA

Sponsored and Published by
SPIE

Volume 6693

Proceedings of SPIE, 0277-786X, v. 6693

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Techniques and Instrumentation for Detection of Exoplanets III*, edited by Daniel R. Coulter, Proceedings of SPIE Vol. 6693 (SPIE, Bellingham, WA, 2007) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/07/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE 
Digital Library

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

ix *Conference Committee*

SESSION 1 TPF EXTERNAL OCCULTER I

- 6693 02 **New Worlds Observer: system architecture for terrestrial planet finding (Invited Paper)** [6693-01]
J. W. Arenberg, R. S. Polidan, T. Glassman, A. S. Lo, C. F. Lillie, Northrop Grumman Corp. (USA)

SESSION 2 TPF EXTERNAL OCCULTER II

- 6693 03 **The dark side of TPF: detecting and characterizing extra-solar Earth-like planets with one or two external occulters** [6693-02]
S. L. Hunyadi, Jet Propulsion Lab. (USA); A. S. Lo, Northrop Grumman Corp. (USA);
S. B. Shaklan, Jet Propulsion Lab. (USA)

SESSION 3 TPF EXTERNAL OCCULTER III

- 6693 04 **Optimal design of petal-shaped occulters for extra-solar planet detection** [6693-03]
E. J. Cady, N. J. Kasdin, R. Vanderbei, R. Belikov, Princeton Univ. (USA)
- 6693 05 **Laboratory studies of petal-shaped occulters** [6693-04]
E. Schindhelm, A. Shipley, P. Oakley, Univ. of Colorado (USA); D. Leviton, NASA Goddard Space Flight Ctr. (USA); W. Cash, Univ. of Colorado (USA); G. Card, High Altitude Observatory (USA)
- 6693 06 **Alignment of a terrestrial planet finder starshade at 20–100 megameters** [6693-05]
M. C. Noecker, Ball Aerospace and Technologies Corp. (USA)

SESSION 4 FORMATION FLYING

- 6693 07 **Flight-like ground demonstration of precision formation flying spacecraft** [6693-06]
D. P. Scharf, F. Y. Hadaegh, J. A. Keim, E. G. Benowitz, P. R. Lawson, Jet Propulsion Lab. (USA)

SESSION 5 TPF INTERFEROMETER

- 6693 08 **Terrestrial planet finder interferometer: 2006-2007 progress and plans** [6693-07]
P. R. Lawson, O. P. Lay, S. R. Martin, Jet Propulsion Lab. (USA); C. A. Beichman, California Institute of Technology (USA); K. J. Johnston, US Naval Observatory (USA); W. C. Danchi, NASA Goddard Space Flight Ctr. (USA); R. O. Gappinger, S. L. Hunyadi, A. Ksendzov, B. Mennesson, R. D. Peters, D. P. Scharf, E. Serabyn, S. C. Unwin, Jet Propulsion Lab. (USA)

- 6693 09 **TPF-Emma: concept study of a planet finding space interferometer** [6693-08]
S. R. Martin, D. Scharf, R. Wirz, O. Lay, D. McKinstry, B. Mennesson, G. Purcell, J. Rodriguez,
L. Scherr, J. R. Smith, L. Wayne, Jet Propulsion Lab. (USA)
- 6693 0A **Planet-finding performance of the TPF-I Emma architecture** [6693-09]
O. P. Lay, S. R. Martin, S. L. Hunyadi, Jet Propulsion Lab. (USA)

SESSION 6 MISSIONS AND INSTRUMENTS I

- 6693 0B **Corot Telescope: COROTEL (Invited Paper)** [6693-10]
T. Viard, Thales Alenia Space (France); P. Bodin, CNES (France); A. Magnan, CNRS-LAM
(France); A. Baglin, CNRS-LESIA (France)
- 6693 0C **Finding Earth clones with SIM: the most promising near-term technique to detect, find masses for, and determine three-dimensional orbits of nearby habitable planets (Invited Paper)** [6693-11]
M. Shao, S. C. Unwin, Jet Propulsion Lab. (USA); C. Beichman, California Institute of
Technology (USA); J. Catanzarite, S. J. Edberg, J. C. Marr IV, Jet Propulsion Lab. (USA);
G. Marcy, Univ. of California, Berkeley (USA)
- 6693 0D **SIM PlanetQuest science and technology: a status report** [6693-12]
S. J. Edberg, R. A. Laskin, J. C. Marr IV, S. C. Unwin, M. Shao, Jet Propulsion Lab. (USA)
- 6693 0E **SIM PlanetQuest precision white light interferometry** [6693-13]
M. H. Milman, M. Regehr, C. Zhai, Jet Propulsion Lab. (USA)

SESSION 7 MISSIONS AND INSTRUMENTS II

- 6693 0G **Observing exoplanets with the JWST NIRCcam grisms (Invited Paper)** [6693-15]
T. Greene, NASA Ames Research Ctr. (USA); C. Beichman, Michelson Science Ctr.,
California Institute of Technology (USA); D. Eisenstein, Steward Observatory, Univ. of Arizona
(USA); S. Horner, Lockheed Martin Corp. (USA); D. Kelly, Steward Observatory, Univ. of
Arizona (USA); Y. Mao, Lockheed Martin Corp. (USA); M. Meyer, M. Rieke, Steward
Observatory, Univ. of Arizona (USA); F. Shi, Jet Propulsion Lab. (USA)
- 6693 0H **Hunting planets and observing disks with the JWST NIRCcam coronagraph** [6693-16]
J. E. Krist, C. A. Beichman, J. T. Trauger, Jet Propulsion Lab. (USA); M. J. Rieke, Steward
Observatory, Univ. of Arizona (USA); S. Somerstein, Lockheed Martin Advanced Technology
Ctr. (USA); J. J. Green, Jet Propulsion Lab. (USA); S. D. Horner, Lockheed Martin Corp. (USA);
J. A. Stansberry, Steward Observatory, Univ. of Arizona (USA); F. Shi, Jet Propulsion Lab.
(USA); M. R. Meyer, Steward Observatory, Univ. of Arizona (USA); K. R. Stapelfeldt, Jet
Propulsion Lab. (USA); T. L. Roellig, NASA Ames Research Ctr. (USA)
- 6693 0I **Coronagraph project with the SPICA mission** [6693-17]
K. Enya, Japan Aerospace Exploration Agency (Japan); L. Abe, National Astronomical
Observatory of Japan (Japan); S. Tanaka, K. Haze, M. Venet, T. Nakagawa, H. Katata,
Japan Aerospace Exploration Agency (Japan); M. Tamura, J. Nishikawa, N. Murakami,
National Astronomical Observatory of Japan (Japan); K. Fujita, Y. Itoh, Kobe Univ. (Japan);
O. Guyon, E. A. Pluzhnik, Subaru Telescope, National Astronomical Observatory of Japan
(Japan); T. Wakayama, T. Sato, N. Nakagiri, Nanotechnology Research Institute (Japan)

6693 OJ **TOPS: a small space telescope using phase induced-amplitude apodization (PIAA) to image rocky and giant exo-planets** [6693-18]
O. Guyon, Subaru Telescope, National Astronomical Observatory of Japan (Japan) and Steward Observatory, Univ. of Arizona (USA); J. R. P. Angel, Steward Observatory, Univ. of Arizona (USA); C. Bowers, J. Burge, A. Burrows, J. Codona, NASA Goddard Space Flight Ctr. (USA); T. Greene, NASA Ames Research Ctr. (USA); M. Iye, National Astronomical Observatory of Japan (Japan); J. Kasting, Pennsylvania State Univ. (USA); H. Martin, D. W. McCarthy, Jr., Steward Observatory, Univ. of Arizona (USA); V. Meadows, California Institute of Technology (USA); M. Meyer, Steward Observatory, Univ. of Arizona (USA); E. A. Pluzhnik, Subaru Telescope, National Astronomical Observatory of Japan (USA); N. Sleep, Stanford Univ. (USA); M. Tamura, National Astronomical Observatory of Japan (Japan); D. Tenerelli, Lockheed Martin Corp. (USA); R. Vanderbei, Princeton Univ. (USA); B. Woodgate, NASA Goddard Space Flight Ctr. (USA); R. A. Woodruff, Lockheed Martin Corp. (USA); N. J. Woolf, Steward Observatory, Univ. of Arizona (USA)

6693 OK **A conceptual design for an exoplanet imager** [6693-19]
D. C. Hyland, J. Winkeller, R. Mosher, A. Momin, G. Iglesias, Q. Donnellan, J. Stanley, S. Myers, W. G. Whittington, T. Asazuma, K. Slagle, L. Newton, S. Bourgeois, D. Tejada, B. Young, N. Shaver, J. Cooper, D. Underwood, J. Perkins, N. Morea, R. Goodnight, A. Colunga, S. Peltier, Z. Singleton, J. Brashear, R. McPherson, W. Guillory, S. Patel, R. Stovall, R. Meyer, P. Eberle, C. Morrison, C. Y. Mong, Texas A&M Univ. (USA)

SESSION 8 MISSIONS AND INSTRUMENTS III

6693 OM **Design of a polarization nulling interferometer for exoplanet detection** [6693-21]
J. Spronck, Delft Univ. of Technology (Netherlands); L. L. A. Vosteen, TNO Science and Industry (Netherlands); S. F. Pereira, J. J. M. Braat, Delft Univ. of Technology (Netherlands)

6693 OO **Calculation of signal-to-noise ratio for image formation using multispectral intensity correlation** [6693-23]
D. Hyland, Texas A&M Univ. (USA)

SESSION 9 TPF CORONAGRAPH

6693 OQ **The lighter side of TPF-C: evaluating the scientific gain from a smaller mission concept** [6693-26]
S. L. Hunyadi, S. B. Shaklan, Jet Propulsion Lab. (USA); R. A. Brown, Space Telescope Science Institute (USA)

6693 OR **Broadband wavefront control in a pupil mapping coronagraph** [6693-27]
S. B. Shaklan, A. Give'on, Jet Propulsion Lab. (USA); R. Belikov, L. Pueyo, Princeton Univ. (USA); O. Guyon, Subaru Telescope, National Astronomical Observatory of Japan (USA)

SESSION 10 MISSIONS AND INSTRUMENTS IV

6693 OT **System assessment study of the ESA Darwin Mission: concepts trade-off and first iteration design on novel Emma arrangement** [6693-30]
C. Ruilier, R. Krawczyk, M. Sghedoni, O. Chanal, C. Degrelle, L. Pirson, O. Simane, E. Thomas, Thales Alenia Space (France)

- 6693 0U **X-array aperture configuration in planar or non-planar spacecraft formation for Darwin/TPF-I candidate architectures** [6693-31]
O. Wallner, K. Ergenzinger, R. Flatscher, U. Johann, Astrium GmbH (Germany)
- 6693 0W **TEDI: the TripleSpec Exoplanet Discovery Instrument** [6693-33]
J. Edelstein, M. W. Muterspaugh, Univ. of California, Berkeley (USA); D. J. Erskine, Lawrence Livermore National Lab. (USA); W. M. Feuerstein, M. Marckwordt, E. Wishnow, Univ. of California, Berkeley (USA); J. P. Lloyd, T. Herter, P. Muirhead, G. E. Gull, C. Henderson, S. C. Parshley, Cornell Univ. (USA)

SESSION 11 CORONAGRAPH TECHNOLOGY I

- 6693 0X **Laboratory demonstrations of high-contrast imaging for space coronagraphy (Invited Paper)** [6693-35]
J. Trauger, A. Give'on, B. Gordon, B. Kern, A. Kuhnert, D. Moody, A. Niessner, F. Shi, D. Wilson, Jet Propulsion Lab. (USA); C. Burrows, Metajiva (USA)
- 6693 0Y **Demonstration of high contrast in 10% broadband light with the shaped pupil coronagraph** [6693-36]
R. Belikov, Princeton Univ. (USA); A. Give'on, B. Kern, Jet Propulsion Lab. (USA); E. Cady, M. Carr, Princeton Univ. (USA); S. Shaklan, K. Balasubramanian, V. White, P. Echternach, M. Dickie, J. Trauger, A. Kuhnert, Jet Propulsion Lab. (USA); N. J. Kasdin, Princeton Univ. (USA)
- 6693 0Z **Thickness-dependent optical properties of metals and alloys applicable to TPF coronagraph image masks** [6693-37]
K. Balasubramanian, D. W. Wilson, R. E. Muller, B. D. Kern, E. Sidick, Jet Propulsion Lab. (USA)

SESSION 12 CORONAGRAPH TECHNOLOGY II

- 6693 11 **Advancements of the optical vortex coronagraph** [6693-39]
G. A. Swartzlander, Jr., E. L. Ford, R. Abdul-Malik, J. Kim, College of Optical Sciences, Univ. of Arizona (USA); L. Close, M. A. Peters, Steward Observatory, Univ. of Arizona (USA); D. Palacios, D. Wilson, Jet Propulsion Lab. (USA)
- 6693 12 **Amplitude variations on the ExAO testbed** [6693-40]
J. W. Evans, Lawrence Livermore National Lab. (USA); S. Thomas, D. Dillon, D. Gavel, UCO Lick Observatory, Univ. of California, Santa Cruz (USA); D. Phillion, Lawrence Livermore National Lab. (USA); B. Macintosh, Lawrence Livermore National Lab. (USA) and UCO Lick Observatory, Univ. of California, Santa Cruz (USA)
- 6693 13 **Active thermal figure control for the TOPS II primary mirror** [6693-41]
R. Angel, T. Kang, B. Cuerden, Steward Observatory, Univ. of Arizona (USA); O. Guyon, Subaru Telescope, National Astronomical Observatory of Japan (USA); P. Stahl, NASA Marshall Space Flight Ctr. (USA)
- 6693 14 **Performance study of integrated coronagraph-adaptive optics designs** [6693-42]
L. Pueyo, R. Belikov, J. Kasdin, R. Vanderbei, Princeton Univ. (USA)

SESSION 13 INTERFEROMETER TECHNOLOGY

- 6693 15 **Adaptive nulling in the mid-IR for the Terrestrial Planet Finder interferometer** [6693-43]
R. D. Peters, O. P. Lay, A. Hirai, M. Jeganathan, Jet Propulsion Lab. (USA)
- 6693 16 **A new concept of achromatic phase shifter for nulling interferometry** [6693-44]
D. Rouan, LESIA, Observatoire de Paris, CNRS, UPMC, Univ. Paris Diderot (France); D. Pelat, LUTH, Observatoire de Paris, CNRS, Univ. Paris Diderot (France); M. Ygouf, J.-M. Reess, LESIA, Observatoire de Paris, CNRS, UPMC, Univ. Paris Diderot (France); F. Chemla, GEPI, Observatoire de Paris, CNRS, Univ. Paris Diderot (France); P. Riaud, LESIA, Observatoire de Paris, CNRS, UPMC, Univ. Paris Diderot (France)
- 6693 17 **Deep nulling in unpolarized light** [6693-45]
C. Buisset, Observatoire de la Côte d'Azur (France) and Thales Alenia Space (France); X. Rejeaunier, Thales Alenia Space (France); Y. Rabbia, Observatoire de la Côte d'Azur (France); M. Barillot, Thales Alenia Space (France)
- 6693 18 **Current progress on TPF-I mid-infrared achromatic nulling at the Jet Propulsion Laboratory** [6693-46]
R. O. Gappinger, R. T. Diaz, S. R. Martin, F. M. Loya, P. R. Lawson, Jet Propulsion Lab. (USA)
- 6693 1A **Vectorial analysis of polarization issues in multi-axial nulling interferometers for exoplanet detection** [6693-48]
J. Spronck, S. F. Pereira, J. J. M. Braat, Delft Univ. of Technology (Netherlands)

POSTER SESSION

- 6693 1B **Optimizing the broadband performance of TPF's high-contrast imaging testbed through modeling and simulations** [6693-49]
E. Sidick, B. Kern, A. C. Kuhnert, Jet Propulsion Lab. (USA)
- 6693 1C **Effects of optical-density and phase dispersion of an imperfect band-limited occulting mask on the broadband performance of a TPF coronagraph** [6693-50]
E. Sidick, K. Balasubramanian, Jet Propulsion Lab. (USA)
- 6693 1D **Fractal analysis of noise buried time series signals with applications to exoplanet spectroscopy and bio-data** [6693-51]
G. Tremberger, Jr., T. Holden, E. Cheung, A. Flamholz, P. Marchese, H. Yao, P. Schneider, D. H. Lieberman, T. D. Cheung, Queensborough Community College, CUNY (USA)
- 6693 1E **Effects of scattered light on the performance of the New Worlds Starshade** [6693-52]
J. Arenberg, T. Glassman, A. S. Lo, Northrop Grumman Corp. (USA)
- 6693 1F **Wavelength-dependent complex transmission profiles of band-limited coronagraph occulting masks measured in situ** [6693-53]
B. Kern, D. W. Wilson, Jet Propulsion Lab. (USA)

- 6693 1G **A proposed laser frequency comb-based wavelength reference for high-resolution spectroscopy** [6693-54]
 S. Osterman, Univ. of Colorado, Boulder (USA); S. Diddams, National Institute of Standards and Technology (USA); M. Beasley, C. Froning, Univ. of Colorado, Boulder (USA); L. Hollberg, National Institute of Standards and Technology (USA); P. MacQueen, Univ. of Texas, Austin (USA); V. Mbele, National Institute of Standards and Technology (USA), and National Metrology Institute of South Africa (South Africa); A. Weiner, National Institute of Standards and Technology (USA), and Purdue Univ. (USA)
- 6693 1H **Estimation of confusion in SIM targets with a detailed focal plane model** [6693-56]
 R. Sridharan, R. J. Allen, Space Telescope Science Institute (USA)
- 6693 1I **Hybrid Lyot coronagraph masks and wavefront control for improved spectral bandwidth and throughput** [6693-57]
 D. C. Moody, J. T. Trauger, Jet Propulsion Lab. (USA)
- 6693 1L **Fresnel rhombs as achromatic phase shifters for infrared nulling interferometry: first experimental results** [6693-62]
 C. Hanot, D. Mawet, Univ. of Liège (Belgium); J. Loicq, D. Vandormael, J. Y. Plessier, Ctr. Spatial de Liège (Belgium); J. Surdej, Univ. of Liège (Belgium); S. Habraken, Univ. of Liège (Belgium), and Ctr. Spatial de Liège (Belgium)
- 6693 1M **The annular groove phase mask coronagraph: an achromatic optical vortex** [6693-63]
 D. Mawet, Univ. of Liège (Belgium); P. Riaud, Observatory of Paris-Meudon (France); C. Hanot, Univ. of Liège (Belgium); D. Vandormael, J. Loicq, Ctr. Spatial de Liège (Belgium); J. Baudrand, Observatory of Paris-Meudon (France); J. Surdej, Univ. of Liège (Belgium); S. Habraken, Univ. of Liège (Belgium), and Ctr. Spatial de Liège (Belgium)
- 6693 1N **Potential of space-based infrared Bracewell interferometers for planet detection** [6693-64]
 D. Defrère, Univ. de Liège (Belgium); O. Absil, Lab. d'Astrophysique de l'Observatoire de Grenoble (France); C. Hanot, Univ. de Liège (Belgium); M. Fridlund, European Space Agency (Netherlands)

Program Committee

Charles A. Beichman, Michelson Science Center, California Institute of Technology (USA), and Jet Propulsion Laboratory (USA)

James B. Breckinridge, Jet Propulsion Laboratory (USA)

Tristram T. Hyde, NASA Goddard Space Flight Center (USA)

David C. Hyland, Texas A&M University (USA)

Peter R. Lawson, Jet Propulsion Laboratory (USA)

Marie B. Levine, Jet Propulsion Laboratory (USA)

Martin Charles Noecker, Ball Aerospace and Technologies Corporation (USA)

John T. Trauger, Jet Propulsion Laboratory (USA)

Session Chairs

- 1 TPF External Occulter I
Wesley A. Traub, Jet Propulsion Laboratory (USA)
- 2 TPF External Occulter II
Wesley A. Traub, Jet Propulsion Laboratory (USA)
- 3 TPF External Occulter III
Daniel R. Coulter, Jet Propulsion Laboratory (USA)
- 4 Formation Flying
David W. Miller, Massachusetts Institute of Technology (USA)
- 5 TPF Interferometer
Daniel R. Coulter, Jet Propulsion Laboratory (USA)
- 6 Missions and Instruments I
Charles A. Beichman, Michelson Science Center, California Institute of Technology (USA), and Jet Propulsion Laboratory (USA)
- 7 Missions and Instruments II
Daniel R. Coulter, Jet Propulsion Laboratory (USA)

- 8 Missions and Instruments III
Tristram T. Hyde, NASA Goddard Space Flight Center (USA)
- 9 TPF Coronagraph
Martin C. Noecker, Ball Aerospace and Technologies Corporation
(USA)
- 10 Missions and Instruments IV
David C. Hyland, Texas A&M University (USA)
- 11 Coronagraph Technology I
Marie B. Levine, Jet Propulsion Laboratory (USA)
- 12 Coronagraph Technology II
John T. Trauger, Jet Propulsion Laboratory (USA)
- 13 Interferometer Technology
Peter R. Lawson, Jet Propulsion Laboratory (USA)
