

PROCEEDINGS OF SPIE

*Photonics and Optoelectronics Meetings
(POEM) 2011*

Optical Communication Systems and Networking

**Zisen Zhao
Richard Penty
Chester Shu
Tao Jiang**
Editors

**2–5 November 2011
Wuhan, China**

Organized by
Wuhan National Laboratory for Optoelectronics (China)

Sponsored by
Huazhong University of Science and Technology (China) • China Hubei Provincial Science and Technology Department • Wuhan East Lake National Innovation Model Zone (Optics Valley of China, OVC) • The Optical Society • Hubei Provincial Foreign Experts Affairs Bureau

Supported by
Ministry of Education (China) • State Administration of Foreign Experts Affairs (China) • National Natural Science Foundation Committee of China

Cooperating Organizations
IOP—Institute of Physics • The Laser Institute of America (United States) • IET—The Institution of Engineering and Technology • International Biomedical Optics Society • IEEE Photonics Society (Singapore and Hong Kong Chapters) • Chinese Optical Society

Published by
SPIE

Volume 8331

Proceedings of SPIE, 0277-786X, v. 8331

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Photonics and Optoelectronics Meetings (POEM) 2011: Optical Communication Systems and Networking, edited by Zisen Zhao, Richard Penty, Chester Shu, Tao Jiang, Proc. of SPIE Vol. 8331, 833101 · © 2012 SPIE · CCC code: 0277-786X/12/\$18 · doi: 10.1117/12.928098

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, similar font. To the right of the text is a stylized graphic consisting of three vertical bars of increasing height from left to right, with a curved line above them.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	<i>Symposium Committees</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

SESSION 1 OPTICAL COMMUNICATION SYSTEMS

- 8331 02 **Optical performance monitoring in high-speed optical fiber communication systems (Invited Paper)** [8331-10]
C. Yu, National Univ. of Singapore (Singapore) and A*STAR Institute for Infocomm Research (Singapore); J. Yang, J. Hu, B. Zhang, National Univ. of Singapore (Singapore)
- 8331 03 **All-optical signal processing in PDM systems (Invited Paper)** [8331-34]
A. Yi, Z. Chen, H. Jiang, J. Ye, L. Yan, Southwest Jiaotong Univ. (China)
- 8331 04 **Research on adaptive optics in satellite-to-ground laser communication** [8331-14]
E. Chen, H. Cheng, Beijing Institute of Tracking and Telecommunication Technology (China); X. Li, Y. Wu, The Key Lab. on Adaptive Optics (China); Z. Xiong, Y. Ai, Wuhan Univ. (China)
- 8331 05 **Optical channel capacity: 100 Gb/s, Tb/s and beyond (Invited Paper)** [8331-01]
T. J. Xia, G. Wellbrock, Verizon Communications (United States)
- 8331 06 **Technique and test of packet transmission network** [8331-24]
X. Feng, W. Duan, F. Luo, Wuhan Institute of Technology (China)

SESSION 2 OPTICAL TECHNOLOGIES FOR SWITCHING, ROUTING, FILTERING, SENSING, PROPAGATION

- 8331 07 **Coherent delayed self-heterodyne measurement of laser phase noise** [8331-03]
T. N. Huynh, Dublin City Univ. (Ireland); L. Nguyen, Univ. of Nebraska at Lincoln (United States); L. P. Barry, Dublin City Univ. (Ireland)
- 8331 08 **Routing and signaling schemes for bandwidth-variable (BV) optical networks (Invited Paper)** [8331-37]
X. Zheng, N. Hua, Y. Liu, H. Liu, H. Zhang, Tsinghua Univ. (China)
- 8331 09 **A novel load-balanced fixed routing (LBFR) algorithm for wavelength routed optical networks (Invited Paper)** [8331-22]
G. Shen, Y. Li, L. Peng, Soochow Univ. (China)

SESSION 3 OPTICAL NETWORKS, APPLICATIONS AND SERVICES

- 8331 0A **TCP traffic carrying capabilities of OBS-based hypercubes for datacenters (Invited Paper)** [8331-12]
P. J. Argibay-Losada, Univ. of Vigo (Spain); C. Qiao, State Univ. of New York at Buffalo (United States); L. Peng, SooChow Univ. (China); W. Tang, South-Central Univ. for Nationalities (China)
- 8331 0B **A distributed optical grid network infrastructure for future easy-to-use innovative network services (Invited Paper)** [8331-07]
S. Xu, H. Harai, N. Wada, National Institute of Information and Communications Technology (Japan)

SESSION 4 OPTICAL MODULATION AND CODING

- 8331 0C **A novel approach for optical minimum shift keying signal generation** [8331-05]
C. Yang, B. Huang, Z. Xu, S. Xu, N. Zou, X. Ma, C. Chang, Y. Yang, Huazhong Univ. of Science and Technology (China)
- 8331 0D **Recent progress on coherent optical OFDM (Invited Paper)** [8331-35]
Q. Yang, Z. He, M. Luo, X. Zhang, Z. Yang, S. Yu, State Key Lab. of Optical Communication Technologies and Networks (China); S. You, G. Shen, Soochow Univ. (China); X. Yi, Univ. of Electronic Science and Technology (China); W. Shieh, Univ. of Melbourne (Australia)
- 8331 0E **An orthogonal multi-carrier source for realizing high speed all-optical OFDM system** [8331-30]
J. Tang, M. Xia, W. Li, K. Yang, X. Zhang, F. Ye, Y. Fan, Z. Zhang, H. Cheng, Huazhong Univ. of Science and Technology (China)
- 8331 0F **Secure optical communication based on optical code reconfiguration scheme (Invited Paper)** [8331-39]
X. Wang, Z. Gao, B. Dai, Heriot-Watt Univ. (United Kingdom); N. Kataoka, N. Wada, National Institute of Information and Communications Technology (Japan)

POSTER SESSION

- 8331 0G **Terabit optical access networks using ultra-dense WDM and coherent technology** [8331-08]
M. Zhu, Georgia Institute of Technology (United States); J. Liu, Xi'an Univ. of Posts and Telecommunications (China) and Georgia Institute of Technology (Georgia); Y.-T. Hsueh, G.-K. Chang, Georgia Institute of Technology (United States); G. Gu, F. Zhu, AOC Technologies Co. Ltd (China)
- 8331 0H **S-band gain-flattened EDFA with two-stage double-pass configuration** [8331-25]
H.-W. Fu, Xi'an Shiyou Univ. (China) and Northwest Univ. (China); S.-C. Xu, Xi'an Shiyou Univ. (China); X.-G. Qiao, Northwest Univ. (China) and Xi'an Shiyou Univ. (China); Z.-A. Jia, Y.-G. Liu, H. Zhou, Xi'an Shiyou Univ. (China)
- 8331 0I **Entanglement of a one-atom dressed-state laser** [8331-21]
X. Zhang, Xiaogan Univ. (China)

- 8331 0J **Research on the diffraction characteristic of TE₁ mode in planar optical waveguide** [8331-32]
F. Chen, L. Li, F. Guo, Z. Gao, Fujian Normal Univ. (China)
- 8331 0K **A performance enhanced user-space remote procedure call on InfiniBand** [8331-09]
L. Ming, D. Feng, F. Wang, Q. Chen, Y. Li, Y. Wan, J. Zhou, Huazhong Univ. of Science & Technology (China) and Wuhan National Lab for Optoelectronics (China)
- 8331 0L **Optical CPFSK with an arbitrary modulation index** [8331-27]
N. Zou, C. Yang, Huazhong Univ. of Science and Technology (China); W. Li, Wuhan National Lab for Optoelectronics (China); B. Huang, Z. Xu, S. Xu, Huazhong Univ. of Science and Technology (China)
- 8331 0M **Dispersion and dispersion slope compensation impact on high channel bit rate optical signal transmission degradation** [8331-13]
M. Hamidine, X. Yuan, Huazhong Univ. of Science and Technology (China)
- 8331 0N **An underwater optical wireless communication system based on LED source** [8331-19]
J. Rao, W. Wei, F. Wang, X. Zhang, Naval Univ. of Engineering (China)
- 8331 0O **Effect of initial frequency chirp on the supercontinuum generation in all-normal dispersion photonic crystal fibers** [8331-11]
C. Cheng, Huazhong Univ. of Science and Technology (China) and Hubei Univ. of Technology (China); Y. Wang, Huazhong Univ. of Science and Technology (China); Q. Lv, Huazhong Univ. of Science and Technology (China) and Hubei Univ. of Technology (China)
- 8331 0P **Performance comparison of modulation technologies for indoor wireless optical communication** [8331-17]
Q. Xu, C. Zhou, J. Peng, Anhui Univ. of Architecture (China); Y. Song, Fiberhome Telecommunication Technologies Co., Ltd (China)
- 8331 0Q **A quaternary minimum shift keying for high - speed optical communication** [8331-26]
N. Zou, Huazhong Univ. of Science and Technology (China); C. Yang, W. Li, Wuhan National Lab. for Optoelectronics (China); B. Huang, Z. Xu, S. Xu, Huazhong Univ. of Science and Technology (China)
- 8331 0R **Impact of phase noise on coherent BPSK homodyne systems in long-haul optical fiber communications** [8331-04]
G. Yu, X. Xie, W. Zhao, W. Wang, S. Yan, Xi'an Institute of Optics and Precision Mechanics (China)
- 8331 0S **An optical MGDM communication system based on optical ray** [8331-38]
Y. Fan, T. Wang, H. Cheng, Z. Zhang, L. Liu, W. Li, Huazhong Univ. of Science and Technology (China); S. Yu, Wuhan Research Institute of Posts & Telecommunications (China)

Symposium Committees

Symposium Chairs

Chaohui Ye, Wuhan National Laboratory for Optoelectronics (China)
Zhong Lin Wang, Georgia Institute of Technology (United States) and
Wuhan National Laboratory for Optoelectronics (China)
Bingkun Zhou, Tsinghua University (China)

International Advisory Committee

Stephen Z. D. Cheng, University of Akron (United States)
Yibing Cheng, Monash University (Australia) and Wuhan National
Laboratory for Optoelectronics (China)
Min Gu, Swinburne University of Technology (Australia)
Andrew B. Holmes, The University of Melbourne (Australia)
Chinlon Lin, Bell Laboratories (retired, United States)
Shenggang Liu, University of Electronic Science and Technology of
China (China)
Jesper Moerk, Technical University of Denmark (Denmark)
Dennis L. Matthews, University of California, Davis (United States)
Jiacong Shen, Jilin University (China)
Chester C. T. Shu, Chinese University of Hong Kong (Hong Kong, China)
Valery V. Tuchin, Saratov State University (Russian Federation)
Bruce Tromberg, University of California, Irvine (United States)
Peiheng Wu, University of Nanjing (China)
Alan Willner, University of Southern California (United States)
Lihong Wang, Washington University in St. Louis (United States)
C. P. Wong, Georgia Institute of Technology (United States)
Jianquan Yao, Tianjin University (China) and Wuhan National
Laboratory for Optoelectronics (China)
Xi Zhang, Tsinghua University (China)
X. C. Zhang, Rensselaer Polytechnic Institute (United States) and
Wuhan National Laboratory for Optoelectronics (China)

Program Committee

Qingming Luo, *Chair*, Wuhan National Laboratory for Optoelectronics
(China)
Perry Ping Shum, Nanyang Technological University (Singapore) and
Wuhan National Laboratory for Optoelectronics (China)
Yibing Cheng, Monash University (Australia) and Wuhan National
Laboratory for Optoelectronics (China)
Junhao Chu, Shanghai Institute of Technical Physics (China)
Zhijiang Dong, Aqualite Co., Ltd. (China)
Pierre Galarneau, National Optics Institute, INO (Canada)

Bin Hu, University of Tennessee (United States) and Wuhan National Laboratory for Optoelectronics (China)
Erich Kasper, Universität Stuttgart (Germany)
Xun Li, McMaster University (Canada) and Wuhan National Laboratory for Optoelectronics (China)
Xu Liu, Zhejiang University (China)
Richard Penty, University of Cambridge (United Kingdom)
Chester Shu, Chinese University of Hong Kong (Hong Kong, China)
Valery V. Tuchin, Saratov State University (Russian Federation)
Lihong Wang, Washington University in St. Louis (United States)
Dapeng Yan, Raycus Fiber Laser Technologies Company Ltd. (China)
Jianquan Yao, Tianjin University (China) and Wuhan National Laboratory for Optoelectronics (China)
Jinzhong Yu, Institute of Semiconductors (China)
X. C. Zhang, Rensselaer Polytechnic Institute (United States) and Wuhan National Laboratory for Optoelectronics (China)
Zisen Zhao, Fiberhome (China), Wuhan Research Institute of Post and Telecommunications (China), and Wuhan National Laboratory for Optoelectronics (China)

Local Organizing Committee

Lin Lin, *Chair*, Wuhan National Laboratory for Optoelectronics (China)
Xiwen Sun, Administration Committee of Wuhan East Lake Hi-Tech Development Zone (China)
Sihai Chen, Wuhan National Laboratory for Optoelectronics (China)
Tao Jiang, Huazhong University of Science and Technology (China)
Pengcheng Li, Wuhan National Laboratory for Optoelectronics (China)
Jinsong Liu, Huazhong University of Science and Technology (China)
Yan Shen, Huazhong University of Science and Technology (China)
Wen Sun, Chutian Laser Group (China)
Jinsong Xia, Wuhan National Laboratory for Optoelectronics (China)
Changsheng Xie, Wuhan National Laboratory for Optoelectronics (China)
Xinliang Zhang, Wuhan National Laboratory for Optoelectronics (China)
Zhihong Zhang, Wuhan National Laboratory for Optoelectronics (China)
Yuandi Zhao, Wuhan National Laboratory for Optoelectronics (China)
Xiao Zhu, Huazhong University of Science and Technology (China)

Local Secretariat

Xiaochun Xiao, Wuhan National Laboratory for Optoelectronics (China)
Weiwei Dong, Wuhan National Laboratory for Optoelectronics (China)

Conference Committee

Conference Chairs

Zisen Zhao, Fiberhome and Wuhan Research Institute of Posts and Telecommunications (China) and Wuhan National Laboratory for Optoelectronics (China)

Richard Penty, University of Cambridge (United Kingdom)

Chester Shu, The Chinese University of Hong Kong (Hong Kong, China)

Tao Jiang, Huazhong University of Science and Technology (China)

Session Chairs

- 1 Optical Communication Systems
Changyuan Yu, National University of Singapore (Singapore)
- 2 Optical Technologies for Switching, Routing, Filtering, Sensing, Propagation
Lianshan Yan, Southwest Jiaotong University (China)
- 3 Optical Networks, Applications and Services
Ping Kong Alexander Wai, The Hong Kong Polytechnic University (Hong Kong, China)
- 4 Optical Modulation and Coding
Qi Yang, Wuhan Research Institute of Post and Telecommunications (China)

Poster Session

Tao Jiang, Huazhong University of Science & Technology (China)

Introduction

The 4th International Photonics and Optoelectronics Meetings (POEM 2011) combined with the 10th International Conference on Photonics and Imaging in Biology and Medicine (PIBM 2011) was held during 2–5 November 2011 at Wuhan Science & Technology Convention & Exhibition Center, Wuhan, P.R. China. This volume contains manuscripts of a selection from the invited talks delivered at the conference and the poster presentations.

The POEM is an international conference of broad scale and multidiscipline, which is extended over a large area of optoelectronics, initiated by WNLO. Aimed at giving full play to the industrial advantage of Wuhan Optics Valley of China, building an independent brand for our international conference, facilitating the regional economic development, promoting the academic reputation and international status of WNL), domestic and internationally renowned academic institutes and organizations in the area of optoelectronics were invited to provide professional support. On such an international platform, POEM was built into a high-level academic conference that integrates academia and industry with the support from Wuhan Optics Valley of China.

POEM 2011 broadened the themes, conducting extensive discussions on four major areas including biomedical photonics, industrial photonics, information photonics and photonics for energy.

POEM 2011 was open to all individuals and entities, domestic and international, which have interest in our four technical areas. The six sub conferences of POEM 2011 were: (1) 10th International Conference on Photonics and Imaging in Biology and Medicine (PIBM 2011); (2) Laser and Tera-Hertz Science and Technology (LTST); (3) Optoelectronic Sensing and Imaging (OSI); (4) Optoelectronic Devices and Integration (OEDI); (5) Optical Communication Systems and Networking (OCSN); and (6) Solar Cells, Solid State Lighting and Information Display Technologies (SSID).

Besides the six sub conferences in four major areas, POEM was organized along with symposiums and workshops including: Workshop on Technology Transfer Models, Sino-Russia Symposium on Biophotonics and Biomedical Photonic, the China-Australia Symposium on Optoelectronic Materials and Devices, 1st Workshop on International Laser Technology and Industrialization, 5th Sino-Russian Laser Technology Forum, 2nd International Workshop on Nanomaterials and Nanosystems (INN 2011). The 40th anniversary of the College of Optoelectronic Science and Engineering at HUST was also celebrated at the same time. Activities such as the Workshop on Immunophotonics, the Workshop on Optical Imaging in Brain Connectivity, the Workshop on Organic Spin Optoelectronics, as well as training courses in Optoelectronic Devices and Integration, and courses given by

travelogue scholars from OSA were arranged to provide a variety of choices for the attendees.

POEM owes its distinguished features to its wide-ranging topics and contents, highly professional delegates, and a strong academic atmosphere. Presentations given by experts worldwide demonstrated previously unpublished cutting-edge scientific achievements. Popular activities such as speeches and posters were intensively organized to provide a unique and immediate access for scientists, entrepreneurs, and students all over the world.

We gratefully thank the financial support by 111 Project (B07038), the National Natural Science Foundation Committee of China (NNSFC)'s funding support. We would like to thank all the authors for their contributions to POEM 2011 and all the members of the committees for their cooperation and time spent reviewing submissions. We would like to extend our sincere thanks for your attendance, support, and contributions at POEM 2011 in Wuhan.

According to different technical areas, the proceedings were divided into six topical volumes:

- 10th International Conference on Photonics and Imaging in Biology and Medicine (PIBM 2011),
- Laser and Tera-Hertz Science and Technology (LTST),
- Optoelectronic Sensing and Imaging (OSI),
- Optoelectronic Devices and Integration (OEDI),
- Optical Communication Systems and Networking (OCSN), and
- Solar Cells, Solid State Lighting and Information Display Technologies (SSID).
