

PROCEEDINGS OF SPIE

Nanophotonics and Macrophotonics for Space Environments VI

**Edward W. Taylor
David A. Cardimona**
Editors

**13–14 August 2012
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 8519

Proceedings of SPIE 0277-786X, V. 8519

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Nanophotonics and Macrophotonics for Space Environments VI, edited by Edward W. Taylor,
David A. Cardimona, Proc. of SPIE Vol. 8519, 851901 · © 2012 SPIE
CCC code: 0277-786/12/\$18 · doi: 10.1117/12.2012098

Proc. of SPIE Vol. 8519 851901-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Nanophotonics and Macrophotonics for Space Environments VI*, edited by Edward W. Taylor, David A. Cardimona, Proceedings of SPIE Vol. 8519 (SPIE, Bellingham, WA, 2013) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/13/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii *Conference Committee*

SESSION 1 NOVEL MATERIALS AND COMPONENTS FOR SPACE APPLICATIONS I

- 8519 03 **Gamma-ray irradiation of ohmic MEMS switches (Invited Paper)** [8519-2]
J. J. Maciel, J. L. Lampen, Radant MEMS, Inc. (United States); E. W. Taylor, International Photonics Consultants, Inc. (United States)
- 8519 04 **Advanced materials and device technology for photonic electric field sensors (Invited Paper)** [8519-3]
J. E. Toney, V. E. Stenger, S. A. Kingsley, A. Pollick, S. Sriram, SRICO Inc. (United States); E. Taylor, International Photonics Consultants, Inc. (United States)
- 8519 05 **3D sensor development to support EDL (entry, descent, and landing) for autonomous missions to Mars (Invited Paper)** [8519-20]
B. Schmidt, S. Tuvey, P. S. Banks, Tetravue Inc. (United States)

SESSION 2 NOVEL MATERIALS AND COMPONENTS FOR SPACE APPLICATIONS II

- 8519 07 **Nanoengineered quantum dot medium for space optoelectronic devices (Keynote Paper)** [8519-6]
S. Oktyabrsky, V. Tokranov, M. Yakimov, Univ. at Albany, SUNY (United States); A. Sergeev, V. Mitin, Univ. at Buffalo, SUNY (United States)
- 8519 08 **Enabling an all-guided-wave mid-IR laser source (Invited Paper)** [8519-7]
F. K. Hopkins, D. E. Diggs, Air Force Research Lab. (United States)

SESSION 3 ADVANCEMENT OF NEW AND EMERGING QUANTUM MATERIALS

- 8519 0A **Polymer frontier orbital and morphology engineering for nanophotonics (Invited Paper)** [8519-9]
S. S. Sun, T. Nguyen, J. Brooks, A. Harding, E. Song, T. David, C. Zhang, Norfolk State Univ. (United States)
- 8519 0B **Enhancing microscopic cascading contributions to higher-order nonlinear-optical responses through forced geometric constraints (Invited Paper)** [8519-10]
N. J. Dawson, J. H. Andrews, M. Crescimanno, Youngstown State Univ. (United States)
- 8519 0C **An all-optical protocol to determine the molecular origin of radiation damage/enhancement in electro-optic polymeric materials (Invited Paper)** [8519-11]
J. Pérez-Moreno, Katholieke Univ. Leuven (Belgium) and Skidmore College (United States); S. Van Cleuvenbergen, M. Vanbel, K. Clays, Katholieke Univ. Leuven (Belgium); E. W. Taylor, International Photonics Consultants, Inc. (United States)

- 8519 0D **Potential energy optimization and Monte Carlo simulations of the first hyperpolarizability: a comparative study (Invited Paper)** [8519-12]
S. Shafei, M. G. Kuzyk, Washington State Univ. (United States)

SESSION 4 SELF-HEALING MATERIALS FOR SPACE APPLICATIONS

- 8519 0E **Correlated aggregate model of self-healing in dye-doped polymers (Invited Paper)** [8519-13]
M. G. Kuzyk, S. Ramini, Washington State Univ. (United States)
- 8519 0F **Correlation between molecular structure and self-healing in a series of Anthraquinone derivatives doped in PMMA polymer (Invited Paper)** [8519-14]
P. Dhakal, S. K. Ramini, M. G. Kuzyk, Washington State Univ. (United States)
- 8519 0G **Reversible photodegradation through chromophore-polymer interactions in Disperse Orange 11 dye-doped PMMA thin films (Invited Paper)** [8519-15]
S. K. Ramini, M. G. Kuzyk, Washington State Univ. (United States)
- 8519 0H **Measuring electric field dependent photodegradation and recovery of disperse orange 11 dye doped polymer thin films using photoconductivity and digital imaging microscopy (Invited Paper)** [8519-16]
B. Anderson, S. T. Hung, M. G. Kuzyk, Washington State Univ. (United States)
- 8519 0I **Azobenzene compound-based photomechanical actuator devices (Invited Paper)** [8519-17]
X. Ye, M. G. Kuzyk, Washington State Univ. (United States)

SESSION 5 ADVANCES IN PHOTONIC COMPONENTS FOR SPACE I

- 8519 0K **The use of small x-ray detectors for deep space relative navigation** [8519-19]
P. T. Doyle, D. Gebre-Egziabher, Univ. of Minnesota (United States); S. I. Sheikh, ASTER Labs, Inc. (United States)
- 8519 0L **Biopolymer-based dielectric materials for space environments (Invited Paper)** [8519-4]
F. Ouchen, Air Force Research Lab. (United States) and Univ. of Dayton Research Institute (United States); D. M. Joyce, Air Force Research Lab. (United States); N. Venkat, S. R. Smith, Air Force Research Lab. (United States) and Univ. of Dayton Research Institute (United States); G. Subramanyam, Univ. of Dayton (United States); E. Taylor, International Photonics Consultants, Inc. (United States); J. G. Grote, Air Force Research Lab. (United States)
- 8519 0M **Femtosecond fiber laser based micro- and nano-processing (Invited Paper)** [8519-21]
H. Huang, L.-M. Yang, J. Liu, PolarOnyx, Inc. (United States)
- 8519 0N **Single-frequency gain-switched Ho-doped fiber laser (Invited Paper)** [8519-22]
J. Geng, Q. Wang, T. Luo, B. Case, S. Jiang, AdValue Photonics, Inc. (United States); F. Amzajerdian, J. Yu, NASA Langley Research Ctr. (United States)

SESSION 6 ADVANCES IN PHOTONIC COMPONENTS FOR SPACE II

- 8519 00 **Performance testing of lidar components subjected to exposure in space via MISSE 7 mission (Invited Paper)** [8519-23]
N. S. Prasad, NASA Langley Research Ctr. (United States)

Author Index

Conference Committee

Program Track Chairs

Stephen M. Hammel, Space and Naval Warfare Systems Command
(United States)

Alexander M. J. van Eijk, TNO Defence, Security and Safety
(Netherlands)

Conference Chairs

Edward W. Taylor, International Photonics Consultants, Inc.
(United States)

David A. Cardimona, Air Force Research Laboratory (United States)

Conference CoChairs

Ronald G. Pirich, Northrop Grumman Aerospace Systems
(United States)

Narasimha S. Prasad, NASA Langley Research Center (United States)

Conference Program Committee

Koen Clays, Katholieke Universiteit Leuven (Belgium)

Vincent M. Cowan, Air Force Research Laboratory (United States)

Michael J. Hayduk, Air Force Research Laboratory (United States)

Mark G. Kuzyk, Washington State University (United States)

Javier Pérez-Moreno, Katholieke Universiteit Leuven (Belgium)

Session Chairs

- 1 Novel Materials and Components for Space Applications I
Narasimha S. Prasad, NASA Langley Research Center (United States)
- 2 Novel Materials and Components for Space Applications II
Edward W. Taylor, International Photonics Consultants, Inc.
(United States)
- 3 Advancement of New and Emerging Quantum Materials
Javier Pérez-Moreno, Katholieke Universiteit Leuven (Belgium)
Mark G. Kuzyk, Washington State University (United States)

- 4 Self-Healing Materials for Space Applications
Nathan J. Dawson, Air Force Research Laboratory (United States)
Vincent M. Cowan, Air Force Research Laboratory (United States)
- 5 Advances in Photonic Components for Space I
David A. Cardimona, Air Force Research Laboratory (United States)
- 6 Advances in Photonic Components for Space II
Vincent M. Cowan, Air Force Research Laboratory (United States)
