

PROCEEDINGS OF SPIE

Optical and Electronic Cooling of Solids III

Richard I. Epstein
Denis V. Seletskiy
Mansoor Sheik-Bahae
Editors

30–31 January 2018
San Francisco, California, United States

Sponsored and Published by
SPIE

Volume 10550

Proceedings of SPIE 0277-786X, V. 10550

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optical and Electronic Cooling of Solids III, edited by Richard I. Epstein, Denis V. Seletskiy,
Mansoor Sheik-Bahae, Proc. of SPIE Vol. 10550, 1055001 · © 2018 SPIE
CCC code: 0277-786X/18/\$18 · doi: 10.1117/12.2323211

Proc. of SPIE Vol. 10550 1055001-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical and Electronic Cooling of Solids III*, edited by Richard I. Epstein, Denis V. Seletskiy, Mansoor Sheik-Bahae, Proceedings of SPIE Vol. 10550 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

CRYOGENIC COOLING IN Yb:HOST SYSTEMS

10550 05	Laser cooling of solids: latest achievements and prospects (Invited Paper) [10550-4]
----------	---

RADIATION-BALANCED LASERS

10550 0B	Investigation of radiation-balanced disk lasers [10550-10]
----------	---

LASER COOLING IN SEMICONDUCTORS

10550 0F	Understanding the origin of parasitic absorption in GaAs double heterostructures [10550-14]
----------	--

SYSTEM MODELING AND THERMAL METROLOGY

10550 0K	Model of anti-Stokes cooling in a Yb-doped fiber (Invited Paper) [10550-19]
10550 0M	In-situ fiber temperature sensor for anti-Stokes cooling measurements in doped fibers [10550-21]
10550 0O	Structural and optical characterizations of Yb³⁺ doped GeO₂-PbF₂-PbO glass-ceramics for optical refrigeration [10550-28]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Connie J. Chang-Hasnain, University of California, Berkeley
(United States)

Graham T. Reed, Optoelectronics Research Centre, University of
Southampton (United Kingdom)

Symposium Co-chairs

Jean Emmanuel Broquin, IMEP-LAHC (France)

Shibin Jiang, AdValue Photonics, Inc. (United States)

Program Track Chair

David L. Andrews, University of East Anglia (United Kingdom)

Conference Chairs

Richard I. Epstein, ThermoDynamic Films LLC (United States)

Denis V. Seletskiy, Ecole Polytechnique de Montréal (Canada)

Mansoor Sheik-Bahae, The University of New Mexico (United States)

Conference Program Committee

Gaurav Bahl, University of Illinois at Urbana-Champaign
(United States)

Steven Bowman, U.S. Naval Research Laboratory (United States)

James G. Eden, University of Illinois at Urbana-Champaign
(United States)

Joaquín Fernández, Universidad del País Vasco (Spain)

Matthew Grayson, Northwestern University (United States)

Raman Kashyap, Ecole Polytechnique de Montréal (Canada)

Paul D. LeVan, Air Force Research Laboratory (United States)

Ali Sayir, Air Force Office of Scientific Research (United States)

Mauro Tonelli, Università di Pisa (Italy)

Qihua Xiong, Nanyang Technological University (Singapore)

Session Chairs

- 1 Cryogenic Cooling in Yb:host Systems
Peter J. Pauzauskie, University of Washington (United States)
- 2 Radiation-balanced Lasers
Alexander R. Albrecht, The University of New Mexico (United States)
- 3 Laser Cooling in Semiconductors
Markus P. Hehlen, Los Alamos National Laboratory (United States)
- 4 Electroluminescence and Heat Conversion
Jacob B. Khurgin, Johns Hopkins University (United States)
- 5 System Modeling and Thermal Metrology
Richard I. Epstein, ThermoDynamic Films LLC (United States)
- 6 Novel Approaches to Radiation-balanced Lasers
Azzurra Volpi, The University of New Mexico (United States)
