

PROCEEDINGS OF SPIE

Semiconductor Lasers and Applications XI

Wei Li
Werner H. Hofmann
Yikai Su
Editors

10–12 October 2021
Nantong, China

Sponsored by
SPIE
COS—Chinese Optical Society

Cooperating Organizations

Tsinghua University (China) • Peking University (China) • University of Science and Technology of China (China) • Zhejiang University (China) • Tianjin University (China) • Beijing Institute of Technology (China) • Beijing University of Posts and Telecommunications (China) • Nankai University (China) • Changchun University of Science and Technology (China) • University of Shanghai for Science and Technology (China) • Capital Normal University (China) • Huazhong University of Science and Technology (China) • Beijing Jiaotong University (China) • China Jiliang University (China) • Shanghai Institute of Optics and Fine Mechanics, CAS (China) • Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China) • Institute of Semiconductors, CAS (China) • Institute of Optics and Electronics, CAS (China) • Institute of Physics, CAS (China) • Shanghai Institute of Technical Physics, CAS (China) • China Instrument and Control Society (China) • The Optical Society of Japan (Japan) • Optical Society of Korea (Korea, Republic of) • Australia and New Zealand Optical Society (Australia) • Optics and Photonics Society of Singapore (Singapore) • European Optical Society

Volume 11891

Proceedings of SPIE 0277-786X, V. 11891

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Semiconductor Lasers and Applications XI, edited by Wei Li, Werner H. Hofmann,
Yikai Su, Proc. of SPIE Vol. 11891, 1189101 · © 2021 SPIE
0277-786X · doi: 10.1117/12.2619274

Proc. of SPIE Vol. 11891 1189101-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Semiconductor Lasers and Applications XI*, edited by Wei Li, Werner H. Hofmann, Yikai Su, Proc. of SPIE 11891, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

APPLICATIONS OF LASER DIODES I

- 11891 02 **Optical domain control-based frequency chirped microwave waveform generation and anti-dispersion transmission over optical fiber (Invited Paper) [11891-1]**
- 11891 03 **Carrier phase recovery in optical fiber communication systems using high-order modulation formats [11891-2]**
- 11891 04 **Fiber-optic communication method applied to high-temperature environment [11891-3]**

APPLICATIONS OF LASER DIODES II

- 11891 06 **Accuracy of EGN model in ultra-wideband optical fiber communication systems [11891-5]**
- 11891 07 **Influence of equalization enhanced phase noise on digital nonlinearity compensation in Nyquist-spaced superchannel transmission systems [11891-6]**
- 11891 08 **A scheme for generating multi-channel chaotic signals with time-delay signature suppression [11891-8]**
- 11891 09 **Evaluation of transmission reach and information rates in nonlinear optical fiber communication systems [11891-9]**

SEMICONDUCTOR LASERS I

- 11891 0B **Iterative learning pre-distortion linearization for hybrid integrated frequency-modulated continuous-wave laser source [11891-11]**
- 11891 0C **Low-cost 1.3 μ m InGaAlAs/InP laser integrated with laterally tapered SSC in reverse mesa shape [11891-12]**
- 11891 0D **Structural optimization of reducing the thermal stress and Smile in packaging a high-power diode laser array on a microchannel cooler using gold-tin hard solder [11891-13]**
- 11891 0F **Gain-switched pulses from quantum-dot laser excited state [11891-15]**

SEMICONDUCTOR LASERS II

11891 OH VCSEL line-beam module for LiDAR applications [11891-17]

SUBSYSTEMS USING LASER DIODES I

11891 OK Self-calibrated electrical spectrum measurement of optical frequency comb based on segmental electro-optic up-conversion (Invited Paper) [11891-20]

11891 OM Handwritten numeral recognition utilizing optoelectronic reservoir computing with double reservoir layers [11891-22]

11891 ON Security-enhanced high-speed messages transmission based on chaos synchronization system with phase modulation and phase-to-intensity conversion [11891-23]

SUBSYSTEMS USING LASER DIODES II

11891 OO Optical frequency comb generation by mutual injection in twin-stripe semiconductor laser [11891-24]

11891 OQ Six-primary-laser projection display system compatible with 3D and 2D display [11891-26]

11891 OR Numerical investigation on the frequency-modulated continuous-wave generation based on a semiconductor laser under optical injection from a directly current-modulated semiconductor laser [11891-27]

11891 OS Research on VCSEL transmitter modules for intelligent driving [11891-28]

POSTER SESSION

11891 OT Hybrid integrated modulation bandwidth enhanced laser based on self-injection locking to an external high-Q microring reflector [11891-29]

11891 OU The wavelength tuning performance of narrow-linewidth laser-diode coupled to an external high-Q Si₃N₄ micro-ring resonator [11891-30]

11891 OV Hertz-linewidth hybrid integrated laser based on high-Q Si₃N₄ microring reflectors [11891-31]

11891 OW Laser phase noise measurement based on modified self-homodyne optical coherent receiver with a Faraday rotating mirror [11891-32]

11891 OX Characterization of microwave interaction in electroabsorption-modulated DFB lasers [11891-33]

11891 0Z **Micro lens: components to systems [11891-35]**

11891 11 **Dynamics of self-injection locked multimode diode laser [11891-37]**
