

PROCEEDINGS OF SPIE

High and Low Concentration for Solar Electric Applications III

Martha Symko-Davies
Editor

11–12 August 2008
San Diego, California, USA

Sponsored and Published by
SPIE

Volume 7043

Proceedings of SPIE, 0277-786X, v. 7043

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *High and Low Concentration for Solar Electric Applications III*, edited by Martha Symko-Davies, Proceedings of SPIE Vol. 7043 (SPIE, Bellingham, WA, 2008) Article CID Number.

ISSN 0277-786X
ISBN 9780819472632

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/08/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

- v *Conference Committee*
vii Nanostructures for high-efficiency photovoltaics (Plenary Paper) [7047-102]
H. A. Atwater, California Institute of Technology (United States)
xi Reliability of PV systems (Plenary Paper) [7048-101]
J. H. Wohlgemuth, BP Solar International Inc. (United States)

SOLAR ENERGY PLENARY SESSION

- 7043 02 **Commercialization of large-scale CPV: what lies ahead? (Plenary Paper)** [7043-104]
D. Holland, Solar Systems (Australia)

CPV MODULE AND SYSTEM RELIABILITY

- 7043 05 **Performance of 3-sun mirror modules on sun tracking carousels on flat roof buildings**
[7043-03]
L. Fraas, J. Avery, L. Minkin, JX Crystals, Inc. (United States); C. Maxey, T. Gehl, Oak Ridge
National Lab. (United States); R. Hurt, R. Boehm, Univ. of Nevada, Las Vegas (United States)
- 7043 06 **Reduction of escape cone losses in luminescent solar concentrators with cholesteric
mirrors** [7043-04]
L. H. Slooff, A. R. Burgers, ECN Solar Energy (Netherlands); M. G. Debije, Eindhoven Univ.
of Technology (Netherlands)

CPV CELLS AND RECEIVERS

- 7043 08 **Thermal modeling for rooftop CPV system** [7043-06]
E. Mao, J. Zhao, R. Chang, J. Lu, EnFocus Engineering Corp. (United States)
- 7043 09 **High concentration (2500 suns), high throughput, automated flash tester with calibrated
color balance and intensity control** [7043-07]
M. Ludowise, S. Taylor, E. Lucow, H. Chan, SolFocus, Inc. (United States)
- 7043 0B **Modeling of GaInP/GaAs/Ge and the inverted-grown metamorphic GaInP/GaAs/GaInAs
triple-junction solar cells** [7043-09]
Y. G. Xiao, Z. Q. Li, Z. M. S. Li, Crosslight Software Inc. (Canada)

CPV MODULE AND SYSTEM DESIGN

- 7043 0D **Maximum-performance photovoltaic concentration with unfolded aplanatic optics**
[7043-11]
J. M. Gordon, D. Feuermann, Ben-Gurion Univ. of the Negev (Israel); P. Young, SolFocus,
Inc. (United States)

- 7043 OE **The free form XR photovoltaic concentrator: a high performance SMS3D design** [7043-12]
A. Cvetković, CEDINT, Univ. Politécnica de Madrid (Spain); M. Hernandez, Light Prescriptions Innovators (Spain); P. Benítez, J. C. Miñano, CEDINT, Univ. Politécnica de Madrid (Spain) and Light Prescriptions Innovators Europe S. L. (Spain); J. Schwartz, A. Plesniak, R. Jones, The Boeing Co. (United States); D. Whelan, Boeing Integrated Defense Systems (United States)
- 7043 OF **Multiband solar concentrator using transmissive dichroic beamsplitting** [7043-13]
J. H. Karp, J. E. Ford, Univ. of California, San Diego (United States)
- 7043 OG **Low concentrator PV optics optimization** [7043-14]
L. Sharp, B. Chang, SV Solar (United States)
- 7043 OH **A commercial 1kW CPV system that breaks the \$2/W price barrier** [7043-15]
D. D. Earl, M. J. Cangelosi, T. L. Shaw, Sunlight Direct, Inc. (United States)

POSTER SESSION

- 7043 OI **Analysis and design of holographic solar concentrators** [7043-16]
R. K. Kostuk, The Univ. of Arizona (United States); G. Rosenberg, Prism Solar Technologies, Inc. (United States)
- 7043 OK **Polysilicon thermal micro-actuators for heat scavenging and power conversion** [7043-20]
M. Tecpoyotl-Torres, Univ. Autónoma del Estado de Morelos (Mexico); J. Varona, Univ. Autónoma del Estado de Morelos (Mexico) and McGill Univ. (Canada); A. A. Hamoui, McGill Univ. (Canada); J. Escobedo-Alatorre, Univ. Autónoma del Estado de Morelos (Mexico); J. Sanchez-Mondragón, National Institute for Astrophysics, Optics and Electronics (Mexico)
- 7043 OL **Dspic control system of a solar follower** [7043-21]
M. Tecpoyotl-Torres, J. Escobedo-Alatorre, M. A. Gomez-Vicario, Univ. Autónoma del Estado de Morelos (Mexico); J. Campos-Alvarez, Univ. Nacional Autónoma de México (Mexico); J. Espinoza-Mendoza, Univ. del Sol (Mexico); G. Vera-Dimas, Univ. Autónoma del Estado de Morelos (Mexico); R. Vargas-Bernal, Instituto Tecnológico Superior de Irapuato (Mexico)
- 7043 OM **Experimental design of a fluidized bed solar receiver with direct absorption of concentrated solar radiation** [7043-22]
A. Bounaceur, J. J. Beziau, A. de Ryck, J. C. Poussin, Ctr RAPSODEE, UMR CNRS 2392, Ecole des Mines d'Albi (France); G. Olalde, Lab. Promes, CNRS (France)

Author Index

Conference Committee

Symposium Chair

Ravi Durvasula, Lightfleet Corporation (United States)

Conference Chair

Martha Symko-Davies, National Renewable Energy Laboratory
(United States)

Program Committee

Timothy J. Coutts, National Renewable Energy Laboratory (United States)
Ravi Durvasula, Lightfleet Corporation (United States)
Vahan Garboushian, Amonix Inc. (United States)
Robert McConnell, National Renewable Energy Laboratory (United States)
William E. McMahon, National Renewable Energy Laboratory (United States)
Fannie Posey-Eddy, National Renewable Energy Laboratory (United States)
Raed A. Sherif, Spectrolab, Inc. (United States)

Session Chairs

Solar Energy Plenary Session

Ravi Durvasula, Lightfleet Corporation (United States)

CPV Module and System Reliability

Martha Symko-Davies, National Renewable Energy Laboratory
(United States)

CPV Cells and Receivers

Cheryl E. Kennedy, National Renewable Energy Laboratory (United States)

CPV Module and System Design

Melissa J. Archer, California Institute of Technology (United States)
